

## APPENDIX: GRAPH THEORY

### DID YOU KNOW

#### Making Connections

A chemist sketches the relationship among atoms in a molecule. An engineer draws a schematic diagram of an electrical network. A genealogist charts a family tree. A sociologist maps the power structure of a large corporation. What do all of these drawings have in common? Each one is a system of points (atoms, electrical components, people, segments) connected by line segments. The German mathematician Denes König, who made the first systematic study of such patterns, named them “graphs.”

In the eighteenth-century Prussian town of Königsberg (now the city of Kaliningrad, Russia near the Baltic Sea) seven bridges crossed the Prigel River (Fig. A.1a). Individuals in the area tried to determine whether it was possible to walk a path that would cross each of the seven bridges exactly once. They found that they ended up either not crossing one of the bridges, or crossing one of the bridges more than once. The problem was brought to the attention of the Swiss mathematician Leonhard Euler (pronounced “oiler,” 1707–1783). His study of this problem, now known as the Königsberg bridge problem, laid the groundwork for a modern branch of mathematics called **graph theory**, a topic in a more general area called **topology**. To solve the problem, Euler drew figures called **graphs** or **networks** like that shown in red in Fig. A.1(b). Each dot represented a plot of land and each line a bridge or path. Can you find a path that crosses each bridge exactly once?

Figure A.1

Before we determine whether there is a path that will cross each bridge exactly once, let's consider Example 1.

#### EXAMPLE 1

In Fig. A.2 start at any point and try to trace each figure without retracing a line and without removing your pencil from the paper. If you succeed, indicate your starting point and ending point.

Figure A.2

Odd vertices: A and C  
Even vertex: B

(a)

Odd vertices: A and D  
Even vertices: B, C, and E

(b)

Figure A.3

### SOLUTION:

- The figure can be traced if you start at any point. You will end at the point at which you started.
- The figure can be traced, but only if you start at point A or point B. If you start at point A, you will end at point B, and vice versa.
- The figure can be traced, but only if you start at point A or point B. If you start at point A, you will end at point B, and vice versa.
- The figure cannot be traced without retracing a line.
- The figure can be traced, but only if you start at point A or point B. If you start at point A, you will end at point B, and vice versa.
- The figure can be traced if you start at any point. You will end at the point at which you started.

In order for you to be able to answer the Königsberg bridge problem and understand why we were able to trace all but one of the figures in Example 1 without retracing a line, we must introduce some new terms and concepts.

A **vertex** is any designated point. An **edge** (or an **arc**) is any line, either straight or curved, that begins and ends at a vertex. Figure A.3(a) has three designated vertices, A, B, and C, and two edges, 1 and 2. Figure A.3(b) has five designated vertices, A, B, C, D, and E, and six edges.

A vertex with an odd number of attached edges is called an **odd vertex**. A vertex with an even number of attached edges is called an **even vertex**. Figure A.3(a) has two odd vertices and one even vertex. Figure A.3(b) has two odd vertices and three even vertices.

A **network** is any continuous (not broken) system of edges and vertices.

A network is said to be **traversable** if it can be traced without removing the pencil from the paper and without tracing an edge more than once.

After completing Example 1, do you have an intuitive feeling as to when a figure is traversable? Think about odd and even vertices. Leonhard Euler discovered an important scientific principle concealed in the Königsberg bridge problem. He presented his simple and ingenious solution of that problem to the Russian Academy at St. Petersburg in 1735. Euler developed the following rules of traversability in solving the problem.

### Rules of Traversability

- A network with no odd (all even) vertices is traversable; you may start from any vertex, and you will end where you began.
- A network with exactly two odd vertices is traversable; you must start at either of the odd vertices and you will finish at the other.
- A network with more than two odd vertices is not traversable.

The network in the Königsberg bridge problem (Fig. A.1b) has four odd vertices, so it cannot be traversed. Therefore crossing each bridge only once is impossible. Note that it is impossible for a network to contain an odd number of odd vertices. (If you don't believe this statement, try to construct such a network.)

## DID YOU KNOW

### Networks

Today, graph (network) theory is a flourishing field, useful for dealing with a variety of everyday problems. It is used by the airline industry to arrange the complex network of flights connecting cities and by sports officials planning tournaments and playoff schedules. City planners use it to work out new roads and traffic patterns. Tests are underway in traffic-clogged cities such as Los Angeles to link cars, via an on-board navigational computer, to the city's central traffic-control computer. In this way motorists can be rerouted to less congested roadways.

Now go back to Example 1 and determine which figures are traversable, using these rules. Note that Figs. A.2(a) and A.2(f) are traversable from any point because they contain only even vertices. Figures A.2(b), (c), and (e) have exactly two odd vertices and can be traversed but only by starting at one of the odd vertices, either point A or point B. Figure A.2(d) contains more than two odd vertices and therefore cannot be traversed.

### EXAMPLE 2

The floor plan of a six-gallery art museum is shown in Fig. A.4(a). The openings represent doors, and the letters represent galleries.

- Determine the galleries that contain an odd number of doors; an even number of doors.
- Each gallery can be represented as an odd or even vertex. Use this information to determine whether it is possible to walk through each gallery by using each door only once.
- Determine a path to walk through each gallery by using each door only once.

#### SOLUTION:

- Galleries B and D contain three doors each. Galleries A and F contain two doors each. Galleries C and E have four doors.
- There are only two odd vertices, B and D, so the figure is traversable, and you can walk through the museum by using each door only once.
- You must start in either Gallery B or D (see Fig. A.4b). If you start in B, you will end in D, and vice versa. When you leave Gallery B, you can leave by any of the three doors.

(a)

(b)

Figure A.4

The floor plan in Example 2 can be reduced to a map, where the rooms are the vertices and the doors are the paths. Construct a map of that floor plan now.

## APPENDIX EXERCISES

### Concept/Writing Exercises

- What is a vertex?
- What is an edge (or an arc)?
- Explain how to determine whether a vertex is odd or even.
- In your own words, explain the rules for determining whether a graph is traversable.

### Practice the Skills

In Exercises 5–8, determine the number of vertices and the number of edges.

5.

6.

7.

8.

In Exercises 9 and 10, explain why these two figures represent the same graph.

9.

10.

In Exercises 11 and 12, list the vertices that are odd and the vertices that are even.

### Problem Solving

In Exercises 13–20, determine whether the network is traversable. If it is, state the points from which you may start and end.

In Exercises 21–28, the floor plan of a building is shown.

- Determine the number of rooms that contain an odd number of doors; an even number of doors.
- Use the rules of traversability to determine whether it is possible to walk through the building using each door only once.
- If the answer to part (b) is yes, indicate where you can start and where you will end and describe one such path (for example, A to D to B to . . . etc.).

In Exercises 29 and 30, the floor plan for a suite of rooms is shown. Add an exit door in one of the rooms so that the security guard can enter through the door marked enter, pass through each door only once locking it behind him, and then exit by the door you added. Explain why there is only one possible room in which the door may be placed.

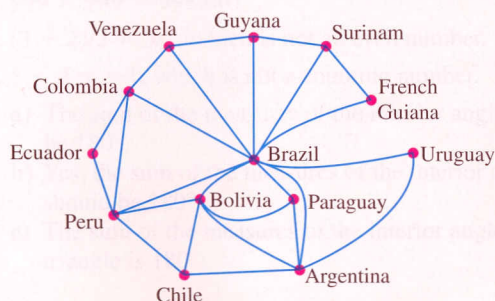

In Exercises 31 and 32, is it possible to cross each bridge exactly once? If it is possible, indicate where the person can start and where the person will finish. Explain your answer.

33. Draw a graph that contains four vertices and is traversable from exactly two points.
34. Draw a graph that contains five vertices that is traversable from exactly two points.
35. In the figure, lines connecting two states indicate that the two states share a common border. Which of these states share a common border with (a) Tennessee? (b) Missouri?

36. In the figure, a line connecting two countries indicates that they share a common border. Which of these countries share a common border with (a) Brazil? (b) Bolivia?

37. The remaining games in a soccer league are illustrated in the graph.

- a) How many games do the Viceroy have remaining?
- b) How many games do the Penguins have remaining?
- c) How many games still need to be played?
38. Dawn, Jessica, Pam, Bill, Ed, and Scott go to a dance. Dawn dances with Bill and Scott. Jessica dances with all the boys and Pam dances only with Scott. Draw a graph that displays this information.
39. France has common borders with Belgium, Germany, Switzerland, Italy, and Spain. Belgium has common borders with the Netherlands, France, and Germany. Germany has common borders with Belgium, Poland, the Czech Republic, Austria, Switzerland, and France. Switzerland has common borders with France, Italy, Austria, and Germany. Draw a graph that displays this information.
40. Can you draw a graph that contains an odd number of odd vertices? If you answer yes draw such a graph.

### Challenge problems/Group Activities

41. Gretchen's Delivery service, located in town C, makes deliveries every day to each town shown on the map. The map also shows the highways connecting the towns and the distances between towns. The delivery service's expenses are lowest when the driver's route is the shortest.

- a) Is the map traversable? Explain.
- b) The least number of miles that can be driven, starting at C and returning to C, that covers every city is 110 miles. Determine a path that covers all the cities and whose distance is 110 miles.
42. Networks (a) and (b) on page AA-6 illustrate a relationship between the number of edges, regions, and vertices. Network (a) has three vertices (A, B, and C), four edges (1, 2, 3, and 4), and three regions (x, y, and z). Network (b) has five vertices (A, B, C, D, and E), seven

edges (1, 2, 3, 4, 5, 6, 7), and four regions (w, x, y, and z). Using these networks and others that you can make up yourself, develop a formula expressing the number of edges in terms of the number of vertices and the number of regions. This formula is known as **Euler's formula for networks**.

### Internet/Research Activity

43. In 1856 William Rowan Hamilton (1805–1865) introduced a problem similar to the Königsberg bridge problem. Hamilton turned his problem into a game that was marketed in 1856. Write a short paper explaining the game. (References include encyclopedias and history of mathematics books and the Internet.)

### Challenge Problems/Group Activities

# ANSWERS

## Chapter 1

### Section 1.1, Page 5

1. a) 1, 2, 3, 4, 5, ... b) Counting numbers
3. A conjecture is a belief based on specific observations that has not been proven or disproven.
5. Deductive reasoning is the process of reasoning to a specific conclusion from a general statement.
7. Inductive reasoning
9. Inductive reasoning, because a generalization was made from specific cases.
11. 1 5 10 10 5 1 13.  $5 \times 9 = 45$
15.  17.  19. 15, 18, 21 21. -1, 1, -1
23.  $\frac{1}{81}, \frac{1}{243}, \frac{1}{729}$  25. 36, 49, 64 27. 34, 55, 89 29. Y
31. a) 36, 49, 64 b) square 6, 7, 8, 9 and 10  
c) No, 72 is between  $8^2$  and  $9^2$ , so it is not a square number.
33. Blue: 1, 5, 7, 10, 12 Purple: 2, 4, 6, 9, 11 Yellow: 3, 8
35. a)  $\approx 58$  million b)  $\approx 45$  million  
c) We are using specific cases to make a prediction.
37. 
39. a) You should obtain the original number.  
b) You should obtain the original number.  
c) The result is the original number.  
d)  $n, 4n, 4n + 8, \frac{4n + 8}{4} = n + 2, n + 2 - 2 = n$
41. a) 5 b) You should obtain the number 5.  
c) The result is always the number 5.  
d)  $n, n + 1, \frac{n + (n + 1) + 9}{2} = \frac{2n + 10}{2} = n + 5, n + 5 - n = 5$
43.  $999 \times 999 = 998,001$
45.  $(3 + 2)/2 = 5/2$ , which is not an even number.
47.  $1 - 2 = -1$ , which is not a counting number.
49. a) The sum of the measures of the interior angles should be  $180^\circ$ .  
b) Yes, the sum of the measures of the interior angles should be  $180^\circ$ .  
c) The sum of the measures of the interior angles of a triangle is  $180^\circ$ .

51. 129, the numbers in positions are found as follows:

$$\begin{array}{c} a \quad b \\ c \quad a + b + c \end{array}$$

53. Counterexample 54. (c)

### Section 1.2, Page 14

Answers in this section will vary depending on how you round your numbers. All answers are approximate.

1. 1170 3. 1,200,000,000 5. 8000 7. 100
9. 364,000,000 11. 1,200,000,000 13. \$20
15. 8500 mi 17. \$85.70 19. \$9000 21. 45 lb
23. 2000 mi 25. \$840 27. \$6 29. \$41 31.  $\approx 375$  mi
33. a) 32.5 million b) 558 counties  
c) Answers will vary.
35. a) 4 million b) 98 million c) 64 million  
d) 275 million
37. a) 83% b) 20% c) 91,771 square miles  
d) No, since we are not given the area of each state.
39. 25 41.  $\approx 90$  berries 43.  $150^\circ$  45. 10%
47. 9 square units 49. 150 feet
- 51.–59. Answers will vary. 60. 118 ridges
61. There are 336 dimples on a regulation golf ball.
62. b) 11.6 days
63. Answers will vary. The U.S. government categorized the middle class as \$32,000 – \$50,000 in 2001.

### Section 1.3, Page 29

1. 187.5 mi 3. 19.36 ft 5. \$4707.53 7. \$800
9. \$12.50 11. \$70 13. \$57,240
15. a)  $\approx 122$   
b) Answers will vary. A close approximation can be obtained by multiplying the U.S. sizes by 2.54.
17. a) 9.2 min b) 62 min c) 40 min d) 150 min
19. a) 30,063,000 b) 97,000 c) 29,100
21. \$82.08 23. a) \$74.40 b) \$264 c) \$64
25. \$34,600 27. 13,906 violations
29. a) Answers will vary. b)  $\approx 267.65$  million  
c)  $\approx 1241.2$  million or 1.2412 billion
31. \$990, less than initial investment
33. a) 48 rolls b) \$198 if she purchases four 10 packs and two 4 packs
35. a) Water/milk: 3 cups; salt:  $\frac{3}{8}$  tsp; Cream of Wheat: 9 tbsp (or  $\frac{9}{16}$  cup)

- b) Water/milk:  $2\frac{7}{8}$  cups; salt:  $\frac{3}{8}$  tsp; Cream of Wheat:  $\frac{5}{8}$  cup (or 10 tbsp)  
 c) Water/milk:  $2\frac{3}{4}$  cups; salt:  $\frac{3}{8}$  tsp; Cream of Wheat:  $\frac{9}{16}$  cup (or 9 tbsp)  
 d) Differences exist in water/milk because the amount for 4 servings is not twice that for 2 servings. Differences also exist in Cream of Wheat because  $\frac{1}{2}$  cup is not twice 3 tbsp.

37. 144 square inches 39. The area is 4 times as large.

41. 1 and 9 43. at  $-1$  45. 10 birds and 12 lizards

47. a) 30 b) 140

51. 

8	6	16
18	10	2
4	14	12

53. The sum of the four corners is 4 times the number in the center.

55. Multiply the center number by 9. 57. 6 ways

Other answers are possible, but 1 and 8 must appear in the center.

61. 

1	2	3	4	5
2	3	4	5	1
3	4	5	1	2
4	5	1	2	3
5	1	2	3	4

Other answers are possible.

63. Mary is the skier. 65. 714 square units

66. 3 ostriches

### Review Exercises, Page 35

1. 23, 28, 33 2. 25, 36, 49 3.  $-48, 96, -192$

4. 25, 32, 40 5. 15, 9, 2 6.  $\frac{3}{8}, \frac{3}{16}, \frac{3}{32}$

7. 8. 9. (c)

10. a) The original number and the final number are the same.

b) The original number and the final number are the same.

c) The final number is the same as the original number.

d)  $n, 2n, 2n + 10, \frac{2n + 10}{2} = n + 5, n + 5 - 5 = n$

11. This process will always result in an answer of 3.

12.  $1^2 + 2^2 = 5$

*The answers to Exercises 13-25 will vary, depending upon how you round the numbers. All answers are approximate.*

13. 420,000,000 14. 2150 15. 200

43. 140 lb

44. Yes; 3 quarters and 4 dimes, or 1 half dollar, 1 quarter and 4 dimes, or 1 quarter and 9 dimes. Other answers are possible.

45.  $216 \text{ cm}^3$

46. Place six coins in each pan with one coin off to the side. If it balances, the heavier coin is the one on the side. If the pan does not balance, take the six coins on the heavier side and split them into two groups of three. Select the three heavier coins and weigh two coins. If the pan balances, it is the third coin. If the pan does not balance, you can identify the heavier coin.

47. 125,250 48. 16 blue 49. 90

50. The fifth figure will be an octagon with sides of equal length. Inside the octagon will be a seven sided figure with each side of equal length. The figure will have one antenna.

51. 61

52. Some possible answers are shown. Others are possible.

53. a) 2 b) 6 c) 24 d) 120

 e)  $n(n-1)(n-2)\dots 1$ , (or  $n!$ ), where  $n$  = the number of people in line

### Chapter Test, Page 38

1. 18, 21, 24

 2.  $\frac{1}{81}, \frac{1}{243}, \frac{1}{729}$ 

3. a) The result is the original number plus 1.

b) The result is the original number plus 1.

c) The result will always be the original number plus 1.

 d)  $n, 5n, 5n+10, \frac{5n+10}{5} = n+2,$   
 $n+2-1 = n+1$ 

The answers for Exercises 4–6 are approximate.

4. 6000 5. 33,000,000 6. 7 square units

 7. a)  $\approx 23.03$ 

b) He is in the at risk range.

 8. 159.25 therms 9. 32 cans 10.  $7\frac{1}{2}$  min

 11.  $\approx 39.5$  in. by 29.6 in. (The actual dimensions are 100.5 cm by 76.5 cm)

12. \$49.00

 13. 

40	15	20
5	25	45
30	35	10

14. Less time if she had driven at 45 mph for the entire trip

 15.  $2 \cdot 6 \cdot 8 \cdot 9 \cdot 13$ ; 11 does not divide 11,232.

16. 243 jelly beans

17. a) \$11.97

b) \$11.81

c) Save 16 cents by using the 25% off coupon.

18. 8

## Chapter 2

### Section 2.1, Page 46

1. A set is a collection of objects.

 3. Description, roster form, and set-builder notation; the set of counting numbers less than 7,  $\{1, 2, 3, 4, 5, 6\}$ , and  $\{x \mid x \in N \text{ and } x < 7\}$ 

5. An infinite set is a set that is not finite.

7. Two sets are equivalent if they contain the same number of elements.

9. The empty set is a set that contains no elements.

11. Two sets that can be placed in a one-to-one correspondence have the same cardinal number and are equivalent.

13. Not well defined 15. Well defined 17. Well defined

19. Infinite 21. Infinite 23. Infinite

25. {Atlantic, Pacific, Arctic, Indian}

 27.  $\{11, 12, 13, 14, \dots, 177\}$  29.  $B = \{2, 4, 6, 8, \dots\}$ 

 31.  $\{\}$  or  $\emptyset$  33.  $E = \{6, 7, 8, 9, \dots, 71\}$ 

35. {Sony DSC-S50, Sony DSC-S70, Sony Mavica FD-90}

37. {Sony Mavica FD-73, Olympus D-360L, Sony DSC-S50, Kodak DC215, H-P Photo Smart C315}

39. {2002, 2003, 2004, 2005, 2006, 2007, 2008}

41. {2002, 2005, 2006, 2007, 2008}

 43.  $B = \{x \mid x \in N \text{ and } 3 < x < 11\}$  or  
 $B = \{x \mid x \in N \text{ and } 4 \leq x \leq 10\}$ 

 45.  $C = \{x \mid x \in N \text{ and } x \text{ is a multiple of } 3\}$ 

 47.  $E = \{x \mid x \in N \text{ and } x \text{ is odd}\}$ 

 49.  $C = \{x \mid x \text{ is February}\}$ 

 51. Set  $A$  is the set of natural numbers less than or equal to 7.

 53. Set  $V$  is the set of vowels in the English alphabet.

 55. Set  $C$  is the set of companies that make calculators.

 57. Set  $B$  is the set of members of the Beatles.

 59. {St. Louis} 61.  $\{\}$  or  $\emptyset$ 

63. {1999, 2000, 2001, 2002} 65. {1999, 2001, 2002}

 67. False;  $\{b\}$  is a set, and not an element of the set.

 69. False;  $h$  is not an element of the set.

71. False; 3 is an element of the set.

73. True 75. 4 77. 0 79. Both 81. Neither

83. Equivalent

 85. a) Set  $A$  is the set of natural numbers greater than 2.  
 Set  $B$  is the set of all numbers greater than 2.

 b) Set  $A$  contains only natural numbers. Set  $B$  contains other types of numbers, including fractions and decimal numbers.

 c)  $A = \{3, 4, 5, 6, \dots\}$

d) No; set  $B$  cannot be written in roster form since we cannot list all the elements in set  $B$ .

87. Cardinal 89. Ordinal 91. Answers will vary.

93. Answers will vary.

### Section 2.2 Page 54

1. Set  $A$  is a subset of set  $B$ , symbolized  $A \subseteq B$ , if and only if all the elements of set  $A$  are also elements of set  $B$ .
3. If  $A \subseteq B$ , then every element of set  $A$  is an element of set  $B$ . If  $A \subset B$ , then every element of set  $A$  is an element of set  $B$  and set  $A \neq B$ .
5. The number of proper subsets is determined by the formula  $2^n - 1$ , where  $n$  is the number of elements in the set.
7. False; gold is an element of the set, not a subset.
9. True 11. True
13. False; the set  $\{\emptyset\}$  contains the element  $\emptyset$ .
15. True 17. False; the set  $\{0\}$  contains the element 0.
19. False 21. True
23. False; no set is a proper subset of itself.
25.  $B \subseteq A, B \subset A$  27.  $B \subseteq A, B \subset A$  29.  $B \subseteq A, B \subset A$
31.  $A = B, A \subseteq B, B \subseteq A$  33.  $\{\}$

### Section 2.3, Page 62

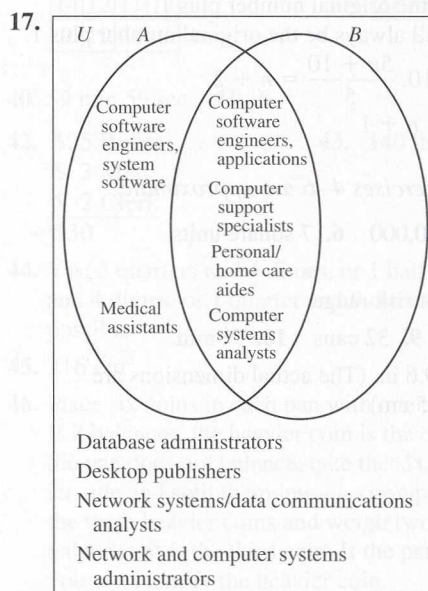

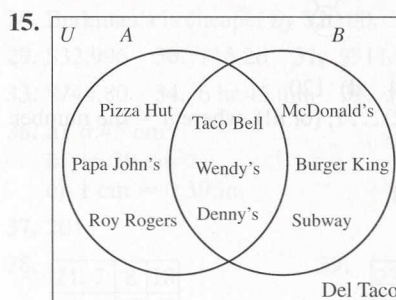

7. Combine the elements from set  $A$  and set  $B$  into one set. List any element that is contained in both sets only once.

9. Take the elements common to both set  $A$  and set  $B$ .

11. a) *Or* is generally interpreted to mean *union*.

b) *And* is generally interpreted to mean *intersection*.

13. Region II, the intersection of the two sets.

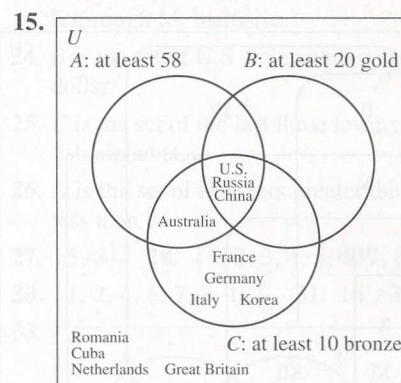

19. The set of U.S. colleges and universities that are not in the state of North Dakota
21. The set of insurance companies in the United States that do not offer life insurance
23. The set of insurance companies in the United States that offer life insurance or car insurance
25. The set of insurance companies in the United States that offer life insurance and do not offer car insurance

27. The set of U.S. corporations whose headquarters are in New York State and whose chief executive officer is a woman
29. The set of U.S. corporations whose chief executive officer is not a woman and who employ at least 100 people
31. The set of U.S. corporations whose headquarters are in New York State or whose chief executive officer is a woman or that employ at least 100 people
33.  $\{b, c, t, w, a, h\}$  35.  $\{a, h\}$
37.  $\{c, w, b, t, a, h, f, g, r\}$  39.  $\{p, m, z\}$
41.  $\{L, \Delta, @, \$, *\}$
43.  $\{L, \Delta, @, *, \$, R, \square, \alpha, \infty, \Sigma, Z\}$  45.  $\{*, \$\}$
47.  $\{R, \square, \alpha\}$  49.  $\{1, 2, 3, 4, 5, 6, 8\}$
51.  $\{1, 5, 7, 8\}$  53.  $\{7\}$  55.  $\{ \}$  57.  $\{7\}$
59.  $\{a, e, h, i, j, k\}$  61.  $\{a, f, i\}$
63.  $\{b, c, d, e, g, h, j, k\}$  65.  $\{a, c, d, e, f, g, h, i, j, k\}$
67.  $\{a, b, c, d, e, f, g, h, i, j, k\}$ , or  $U$  69.  $\{ \}$
71.  $\{2, 4, 6, 8\}$ , or  $B$  73.  $\{7, 9\}$
75.  $\{1, 3, 5, 6, 7, 8, 9\}$  77.  $\{1, 2, 3, 4, 5, 7, 9\}$
79.  $\{2, 4, 6, 8\}$ , or  $B$  81.  $\{1, 2, 3, 4, 5\}$ , or  $C$
83. A set and its complement will always be disjoint. For example, if  $U = \{1, 2, 3\}$ ,  $A = \{1, 2\}$ , and  $A' = \{3\}$ , then  $A \cap A' = \{ \}$ .
85. 49
87. a)  $8 = 4 + 6 - 2$  b) and c) Answers will vary.
89.  $\{1, 2, 3, 4, \dots\}$ , or  $A$  91.  $\{4, 8, 12, 16, \dots\}$ , or  $B$
93.  $\{2, 4, 6, 8, \dots\}$ , or  $C$  95.  $\{2, 6, 10, 14, 18, \dots\}$
97.  $\{2, 6, 10, 14, 18, \dots\}$  99.  $U$  101.  $A$  103.  $U$
105.  $U$  107.  $B \subseteq A$  109.  $A$  and  $B$  are disjoint sets.
111.  $A \subseteq B$  113.  $\{e, f, h\}$  115.  $\{d, j, k\}$  117.  $\{13\}$

## Review Exercises, Page 87

1. True
2. False; the word *best* makes the statement not well defined.
3. True 4. False; no set is a proper subset of itself.
5. False; the elements 6, 12, 18, 24, ... are members of both sets.
6. True
7. False; both sets do not contain exactly the same elements.
8. True 9. True 10. True 11. True 12. True
13. True 14. True 15.  $A = \{7, 9, 11, 13, 15\}$
16.  $\{\text{California, Oregon, Idaho, Utah, Arizona}\}$
17.  $C = \{1, 2, 3, 4, \dots, 296\}$
18.  $D = \{9, 10, 11, 12, \dots, 96\}$
19.  $A = \{x \mid x \in N \text{ and } 52 < x < 100\}$
20.  $B = \{x \mid x \in N \text{ and } x > 63\}$
21.  $C = \{x \mid x \in N \text{ and } x < 3\}$
22.  $D = \{x \mid x \in N \text{ and } 23 \leq x \leq 41\}$
23.  $A$  is the set of capital letters in the English alphabet from E through M, inclusive.
24.  $B$  is the set of U.S. coins with a value of less than a dollar.
25.  $C$  is the set of the last three lowercase letters in the English alphabet.
26.  $D$  is the set of numbers greater than or equal to 3 and less than 9.
27.  $\{5, 6\}$  28.  $\{1, 2, 3, 4, 5, 6, 7, 8\}$  29.  $\{9, 10\}$

c) 30  
d) 110

51.  $\{2, 4, 6, 8, \dots, 2n, \dots\}$

$\downarrow \downarrow \downarrow \downarrow \downarrow$   
 $\{4, 6, 8, 10, \dots, 2n + 2, \dots\}$

52.  $\{3, 5, 7, 9, \dots, 2n + 1, \dots\}$

$\downarrow \downarrow \downarrow \downarrow \downarrow$   
 $\{5, 7, 9, 11, \dots, 2n + 3, \dots\}$

53.  $\{1, 2, 3, 4, \dots, n, \dots\}$

$\downarrow \downarrow \downarrow \downarrow \downarrow$   
 $\{5, 8, 11, 14, \dots, 3n + 2, \dots\}$

54.  $\{1, 2, 3, 4, \dots, n, \dots\}$

$\downarrow \downarrow \downarrow \downarrow \downarrow$   
 $\{4, 9, 14, 19, \dots, 5n - 1, \dots\}$

### Chapter Test, Page 90

- True
- False; the sets do not contain exactly the same elements.
- True
- False; the second set has no subset that contains the element 7.
- False; the empty set is a proper subset of every set except itself.
- False; the set has  $2^3$ , or 8 subsets.
- True
- False; for any set  $A$ ,  $A \cup A' = U$ , not  $\{ \}$ .
- True
- $A = \{1, 2, 3, 4, 5, 6, 7, 8\}$
- Set  $A$  is the set of natural numbers less than 9.
- $\{7, 9\}$     13.  $\{3, 5, 7, 9, 13\}$
- $\{3, 5, 7, 9\}$ , or  $A$     15. 2
- 16.

17. Equal

- a) 38  
b) 298  
c) 28  
d) 236  
e) 106

- a) 52    b) 10    c) 93    d) 17    e) 38    f) 31

19.  $\{7, 8, 9, 10, \dots, n + 6, \dots\}$

$\downarrow \downarrow \downarrow \downarrow \downarrow$   
 $\{8, 9, 10, 11, \dots, n + 7, \dots\}$

20.  $\{1, 2, 3, 4, \dots, n, \dots\}$

$\downarrow \downarrow \downarrow \downarrow \downarrow$   
 $\{1, 3, 5, 7, \dots, 2n - 1, \dots\}$

### Chapter 3

#### Section 3.1, Page 103

- a) A simple statement is a statement that conveys only one idea.
- Compound statements are statements consisting of two or more simple statements.
- a) Some are    b) All are  
c) Some are not    d) None are
- a)  $\rightarrow$     b)  $\vee$     c)  $\wedge$     d)  $\sim$     e)  $\leftrightarrow$
- When two simple statements are on the same side of the comma, they are placed together in parentheses when translated into symbolic form.
- Compound; conjunction,  $\wedge$
- Compound; biconditional,  $\leftrightarrow$
- Compound; disjunction,  $\vee$
- Simple statement    17. Compound; negation,  $\sim$
- Compound; conjunction,  $\wedge$
- Compound; negation,  $\sim$
- No picnic tables are portable.
- Some chickens do not fly.    27. All turtles have claws.
- Some bicycles have three wheels.
- All pine trees produce pinecones.
- No pedestrians are in the crosswalk.
- $\sim p$     37.  $\sim q \vee \sim p$     39.  $\sim p \rightarrow \sim q$     41.  $\sim q \rightarrow \sim p$
- $\sim p \wedge \sim q$     45.  $\sim(q \rightarrow \sim p)$
- Firemen do not work hard.
- Firemen wear red suspenders or firemen work hard.
- Firemen do not work hard if and only if firemen do not wear red suspenders.

53. It is false that firemen wear red suspenders or firemen work hard.
55. Firemen do not work hard and firemen do not wear red suspenders.
57.  $(p \vee \sim q) \rightarrow r$  59.  $(p \wedge q) \vee r$  61.  $p \rightarrow (q \vee \sim r)$
63.  $(r \leftrightarrow q) \wedge p$  65.  $q \rightarrow (p \leftrightarrow r)$
67. The water is 70° or the sun is shining, and we do not go swimming.
69. The water is not 70°, and the sun is shining or we go swimming.
71. If we do not go swimming, then the sun is shining and the water is 70°.
73. If the sun is shining then we go swimming, and the water is 70°.
75. The sun is shining if and only if the water is 70°, and we go swimming.
77. Not permissible, you cannot have both soup and salad. The *or* used on menus is the exclusive *or*.
79. Not permissible, you cannot have both potatoes and pasta. The *or* used on menus is the exclusive *or*.
81. a)  $(\sim p) \rightarrow q$  b) Conditional
83. a)  $(\sim q) \wedge (\sim r)$  b) Conjunction
85. a)  $(p \vee q) \rightarrow r$  b) Conditional
87. a)  $r \rightarrow (p \vee q)$  b) Conditional
89. a)  $(\sim p) \leftrightarrow (\sim q \rightarrow r)$  b) Biconditional
91. a)  $(r \wedge \sim q) \rightarrow (q \wedge \sim p)$  b) Conditional
93. a)  $\sim[(p \wedge q) \leftrightarrow (p \vee r)]$  b) Negation
95. a)  $r \wedge \sim c$  b) Conjunction
97. a)  $\sim(b \rightarrow \sim p)$  b) Negation
99. a)  $(f \vee v) \rightarrow h$  b) Conditional
101. a)  $c \leftrightarrow (\sim f \vee p)$  b) Biconditional
103. a)  $(c \leftrightarrow w) \vee s$  b) Disjunction
105.  $[(\sim q) \rightarrow (r \vee p)] \leftrightarrow [(\sim r) \wedge q]$ ; Biconditional
107. a) The conjunction and disjunction have the same dominance.
- b) Answers will vary. c) Answers will vary.

Blue Yellow Red Green  
Nine Lives Whiskas Friskies Meow Mix
84. Katie was born last. Katie and Mary are saying the same thing.

### Section 3.4, Page 139

1. Statements that have exactly the same truth values
3. The two statements are equivalent.
5. a)  $q \rightarrow p$  b)  $\sim p \rightarrow \sim q$  c)  $\sim q \rightarrow \sim p$  7.  $\sim p \vee q$
9. Equivalent 11. Not equivalent 13. Equivalent
15. Equivalent 17. Equivalent 19. Equivalent
21. Equivalent 23. Equivalent 25. Not equivalent
27. Not equivalent 29. Equivalent
31. The Mississippi River does not run through Ohio and the Ohio River does not run through Mississippi.
33. It is false that the snowmobile was an Arctic Cat or a Ski-Do.
35. It is false that the hotel has a weight room and the conference center has an auditorium.
37. If we go to Cozumel, then it is false that we will not go snorkeling and we will go to Senior Frogs.
39. You do not drink a glass of orange juice or you will get a full day supply of folic acid.
41. If Bob the Tomato didn't visit the nursing home then he did not visit the Cub Scout meeting.
43. The plumbers meet in Kansas City and the Rainmakers will not provide the entertainment.
45. It is cloudy if and only if the front is coming through.
47. If the chemistry teacher teaches mathematics then there is a shortage of mathematics teachers and if there is a shortage of mathematics teachers then the chemistry teacher teaches mathematics.
49. *Converse*: If I finish the book in one week, then the book is interesting.  
*Inverse*: If the book is not interesting, then I will not finish the book in one week.  
*Contrapositive*: If I do not finish the book in one week, then the book is not interesting.
51. *Converse*: If you can watch television, then you finish your homework.  
*Inverse*: If you did not finish your homework, then you cannot watch television.  
*Contrapositive*: If you cannot watch television, then you did not finish your homework.
53. *Converse*: If I scream, then that annoying paper clip shows up on my computer screen.  
*Inverse*: If that annoying paper clip does not show up on my computer screen, then I will not scream.  
*Contrapositive*: If I do not scream, then that annoying paper clip does not show up on my screen.

55. *Converse*: If we go down to the marina and take out the sailboat, then the sun is shining.  
*Inverse*: If the sun is not shining, then we will not go down to the marina or we will not take out the sailboat.  
*Contrapositive*: If we do not go down to the marina or we will not take out the sailboat, then the sun is not shining.
57. If a natural number is divisible by 10, then the natural number is divisible by 5. True.
59. If a natural number is not divisible by 6, then the natural number is not divisible by 3. False.
61. If two lines are not parallel, then the two lines intersect in at least one point. True.
63. If the polygon is a quadrilateral, then the sum of the interior angles of the polygon measures  $360^\circ$ . True.
65. b) and c) are equivalent. 67. a) and c) are equivalent.
69. b) and c) are equivalent. 71. b) and c) are equivalent.
73. None are equivalent. 75. None are equivalent.
77. a) and c) are equivalent. 79. a) and b) are equivalent.
81. True. If  $p \rightarrow q$  is false, it must be of the form  $T \rightarrow F$ . Therefore, the converse must be of the form  $F \rightarrow T$ , which is true.
83. False. A conditional statement and its contrapositive always have the same truth values.
85. Answers will vary. 87. Answers will vary.
89. a) Conditional b) Biconditional c) Inverse  
d) Converse e) Contrapositive

### Section 3.5, Page 150

1. The conclusion necessarily follows from the given set of premises.
3. Yes, if the conclusion necessarily follows from the set of premises, the argument is valid, even if the conclusion is false.
5. Yes, if the conclusion necessarily follows from the set of premises, the argument is valid, even if the premises themselves are false.
7. a)  $p \vee q$  9. a)  $p \rightarrow q$   
 $\frac{\sim p}{\therefore q}$   $\frac{q \rightarrow r}{\therefore p \rightarrow r}$
- b) Answers will vary. b) Answers will vary.
11. a)  $p \rightarrow q$   
 $\frac{\sim p}{\therefore \sim q}$   
b) Answers will vary.
13. Valid 15. Valid 17. Invalid 19. Invalid
21. Invalid 23. Valid 25. Valid 27. Invalid
29. Invalid 31. Valid

33. a)  $p \rightarrow q$   
 $\frac{\sim p}{\therefore \sim q}$   
 b) Invalid
37. a)  $p \rightarrow q$   
 $\frac{\sim q}{\therefore \sim p}$   
 b) Valid
41. a)  $p \vee q$   
 $\frac{\sim p}{\therefore q}$   
 b) Valid
45. a)  $f \rightarrow w$   
 $\frac{w \wedge \sim t}{\therefore w \rightarrow \sim f}$   
 b) Invalid
49. a)  $h \rightarrow b$   
 $\frac{\sim p \rightarrow \sim b}{\therefore h \rightarrow p}$   
 b) Valid
53. a)  $t \vee \sim p$   
 $\frac{p}{\therefore t}$   
 b) Valid
57. a)  $c \wedge \sim h$   
 $\frac{h \rightarrow c}{\therefore h}$   
 b) Invalid
61. Therefore, your face will break out.
63. Therefore, a tick is an arachnid.
65. Therefore, you did not close the deal.
67. Therefore, if you do not pay off your credit card bills, then the bank makes money.
69. No. The conditional statement will always be true, and therefore it will be a tautology, and a valid argument.

### Section 3.6, Page 158

1. It is an invalid argument.
3. The conclusion necessarily follows from the premises.
5. Yes, if the conclusion necessarily follows from the premises, the argument is valid.
7. Valid 9. Valid 11. Invalid 13. Valid
15. Invalid 17. Invalid 19. Invalid 21. Valid
23. Invalid 25. Invalid 27. Valid 29. Invalid

### Review Exercises, Page 161

1. No rock bands play ballads.
2. All bananas are ripe.

3. Some chickens have lips.
4. Some panthers are not endangered.
5. Some pens do not use ink.
6. Some rabbits wear glasses.
7. The coffee is Maxwell House or the coffee is hot.
8. The coffee is not hot and the coffee is strong.
9. If the coffee is hot, then the coffee is strong and the coffee is not Maxwell House.
10. The coffee is Maxwell House if and only if the coffee is not strong.
11. The coffee is not Maxwell House, if and only if the coffee is strong and the coffee is not hot.
12. The coffee is Maxwell House or the coffee is not hot, and the coffee is not strong.
13.  $r \wedge q$  14.  $p \rightarrow r$  15.  $(r \rightarrow q) \vee \sim p$
16.  $(q \leftrightarrow p) \wedge \sim r$  17.  $(r \wedge q) \vee \sim p$  18.  $\sim(r \wedge q)$

39. It is false that Johnny Cash is not in the Rock and Roll Hall of Fame or India Arie did not record *Acoustic Soul*.
40. If her foot did not fall asleep then she injured her ankle.
41. Altec Lansing does not produce only speakers and Harman Kardon does not produce only stereo receivers.
42. It is false that Travis Tritt won an Academy Award or Randy Jackson does commercials for Milk Bone Dog Biscuits.
43. The temperature is above 32° or we will go ice fishing at O'Leary's Lake.
44. a) If you enjoy life, then you hear a beautiful songbird today.  
 b) If you do not hear a beautiful songbird today, then you do not enjoy life.  
 c) If you do not enjoy life, then you do not hear a beautiful songbird today.
45. a) If the quilt has a uniform design, then you followed the correct pattern.  
 b) If you did not follow the correct pattern, then the quilt does not have a uniform design.

- c) If the quilt does not have a uniform design, then you did not follow the correct pattern.
46. a) If Maureen Gerald is helping at the school, then she is not in attendance.  
b) If Maureen Gerald is in attendance, then she is not helping at the school.  
c) If Maureen Gerald is not helping at the school, then she is in attendance.
47. a) If we will not buy a desk at Miller's Furniture, then the desk is made by Winner's Only and the desk is in the Rose catalog.  
b) If the desk is not made by Winner's Only or the desk is not in the Rose catalog, then we will buy a desk at Miller's Furniture.  
c) If we will buy a desk at Miller's Furniture, then the desk is not made by Winner's Only or the desk is not in the Rose catalog.
48. a) If I let you attend the prom, then you will get straight A's on your report card.  
b) If you do not get straight A's on your report card, then I will not let you attend the prom.  
c) If I will not let you attend the prom, then you did not get straight A's on your report card.
49. a), b), and c) are equivalent.    50. None are equivalent.  
51. a) and c) are equivalent.    52. None are equivalent.  
53. Invalid    54. Valid    55. Invalid    56. Valid  
57. Invalid    58. Invalid

## Chapter Test, Page 163

1.  $(p \wedge r) \vee \sim q$     2.  $(r \rightarrow q) \vee \sim p$     3.  $\sim(r \leftrightarrow \sim q)$
4. Ann is the secretary, if and only if Dick is the vice president and Elaine is the president.
5. It is false that if Ann is the secretary, then Elaine is not the president.
6. F    7. T

13. a) and b) are equivalent.    14. a) and b) are equivalent.
15.  $s \rightarrow f$     16. Invalid
- $\frac{f \rightarrow p}{\therefore s \rightarrow p}$
- Valid
17. Some leopards are not spotted.
18. No jacks-in-the-box are electronic.

19. *Converse:* If today is Saturday, then the garbage truck comes.

*Inverse:* If the garbage truck does not come, then today is not Saturday.

**Contrapositive:** If today is not Saturday, then the garbage truck does not come.

- 20. Yes**

## Chapter 4

## Section 4.1, Page 173

1. A number is a quantity, and it answers the question "How many?" A numeral is a symbol used to represent the number.
3. A system of numeration consists of a set of numerals and a scheme or rule for combining the numerals to represent numbers.
5. The Hindu–Arabic numeration system
7. In a multiplicative system, there are numerals for each number less than the base and for powers of the base. Each numeral less than the base is multiplied by a numeral for the power of the base, and these products are added to obtain the number.
9. 142    11. 2423    13. 334,214
15. ○○○○●●●●    17. ☿☿●●●●●●
19. ∞~~~~~⚡⚡⚡○○○○○○○○●●●●●●
21. 19    23. 547    25. 1492    27. 2946    29. 12,666
31. 9464    33. LIX    35. CXXXIV    37. MMV
39. İVDCCXCIII    41. ĪXCMXCIX    43. XXDCXLIV
45. 74    47. 4081    49. 8550    51. 4003
53. 五  
十  
三
55. 三百七十八
57. 四千二百六十
59. 七千零五十六
61. 341    63. 22,505    65. 9607    67.  $\nu\theta$     69.  $\psi\kappa Z$
71.  $\pi'\beta'\psi d$
73. Advantage: You can write some numbers more compactly.  
Disadvantage: There are more numerals to memorize.
75. Advantage: You can write some numbers more compactly.  
Disadvantage: There are more numerals to memorize.
77. 1936, ⚡○○○○○○○○●●●●●●, α' π λ Z, 一千九百三十六

79. 422, 9999nnll, CDXXII, 四百二十二

81.  $\pi'Q'\theta'$   $\pi Q\theta$  83. Turn the book upside down.

84. MM 85. 1888, MDCCCLXXXVIII

### Section 4.2, Page 180

1. A base 10 place-value system 3. Four tens, four hundreds
5. A symbol for zero and for each counting number less than the base are required.
7. Write each digit times its corresponding positional value.
9. a) There may be confusion because numbers could be interpreted in different ways. For example,  $\nabla$  could be interpreted to be either 1 or 60.  
b)  $\nabla \nabla < \nabla \nabla \nabla$  for both numbers.

11. 1, 20,  $18 \times 20$ ,  $18 \times (20)^2$ ,  $18 \times (20)^3$
13.  $(6 \times 10) + (3 \times 1)$
15.  $(3 \times 100) + (5 \times 10) + (9 \times 1)$
17.  $(8 \times 100) + (9 \times 10) + (7 \times 1)$
19.  $(4 \times 1000) + (3 \times 100) + (8 \times 10) + (7 \times 1)$
21.  $(1 \times 10,000) + (6 \times 1000) + (4 \times 100) + (0 \times 10) + (2 \times 1)$
23.  $(3 \times 100,000) + (4 \times 10,000) + (6 \times 1000) + (8 \times 100) + (6 \times 10) + (1 \times 1)$
25. 42 27. 784 29. 4868 31.  $\nabla < \nabla \nabla \nabla$

33.  $\nabla \nabla \nabla \nabla < \nabla \nabla \nabla \nabla \nabla \nabla \nabla$  35.  $\nabla \nabla < \nabla \nabla \nabla \nabla$

37. 92 39. 4321 41. 4000 43.  $\equiv$  45.  $\equiv$

47.  $\frac{\cdot}{\circ}$   
 $\dots$

49. Advantages: In general, they are more compact; large and small numbers can be written more easily; there are fewer symbols to memorize.

Disadvantage: If many of the symbols in the numeral represent zero, the place-value system may be less compact.

51. 33,  $\dots$

53.  $(\triangle \times \square^2) + (\square \times \square) + (\circ \times 1)$

55. a) No largest number

b)  $\nabla \nabla \nabla < \nabla \nabla \nabla \nabla \nabla < \nabla \nabla \nabla \nabla \nabla \nabla < \nabla \nabla \nabla \nabla$

57.  $\nabla \nabla < \nabla \nabla \nabla \nabla \nabla$

59.  $\equiv$   
 $\equiv$   
 $\equiv$

### Chapter 5

#### Section 5.1, Page 216

1. Number theory is the study of numbers and their properties.  
 3. a)  $a$  divides  $b$  means that  $b$  divided by  $a$  has a remainder of zero.  
 b)  $a$  is divisible by  $b$  means that  $a$  divided by  $b$  has a remainder of zero.  
 5. A composite number is a natural number that is divisible by a number other than itself and 1.  
 7. a) The LCM of a set of natural numbers is the smallest natural number that is divisible by each number in the set.  
 b) Answers will vary. c) 80  
 9. Mersenne primes are prime numbers of the form  $2^n - 1$ , where  $n$  is a prime number.  
 11. Goldbach's conjecture states that every even number greater than or equal to 4 can be represented as the sum of two (not necessarily distinct) prime numbers.  
 13. The prime numbers between 1 and 100 are 2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47, 53, 59, 61, 67, 71, 73, 79, 83, 89, and 97.  
 15. True 17. False; 21 is a multiple of 7.  
 19. False; 56 is divisible by 8. 21. True  
 23. False; if a number is divisible by 3, then the sum of the digits of the number is divisible by 3.  
 25. True  
 27. 10,368 is divisible by 2, 3, 4, 6, 8, and 9.  
 29. 2,763,105 is divisible by 3 and 5.  
 31. 1,882,320 is divisible by 2, 3, 4, 5, 6, 8, and 10.  
 33. 60 (other answers are possible)  
 35.  $45 = 3^2 \cdot 5$  37.  $196 = 2^2 \cdot 7^2$

39.  $303 = 3 \cdot 101$  41.  $513 = 3^3 \cdot 19$   
 43.  $1336 = 2^3 \cdot 167$  45.  $2001 = 3 \cdot 23 \cdot 29$   
 47. a) 3 b) 30 49. a) 6 b) 432 51. a) 20 b) 1800  
 53. a) 4 b) 5088 55. a) 8 b) 384  
 57. 17, 19, and 29, 31  
 59. a) Yes b) No c) Yes d) Yes  
 61.  $4 = 2 + 2$ ,  $6 = 3 + 3$ ,  $8 = 3 + 5$ ,  $10 = 3 + 7$ ,  
 $12 = 5 + 7$ ,  $14 = 7 + 7$ ,  $16 = 3 + 13$ ,  
 $18 = 5 + 13$ ,  $20 = 3 + 17$   
 63. 70 dolls 65. 72 cards 67. 180 min 69. 30 days  
 71. a) 4, 5, 10, 20, 25 b) 25, 20, 10, 5, and 4, respectively  
 73. A number is divisible by 15 if both 3 and 5 divide the number.  
 75. 5 77. 36 79. 30 81. No 83. Yes  
 85. a) 12 b) 1, 2, 3, 4, 5, 6, 10, 12, 15, 20, 30, 60  
 87. For any three consecutive natural numbers, one of the numbers is divisible by 2 and another number is divisible by 3. Therefore, the product of the three numbers would be divisible by 6.  
 89. Yes  
 91.  $8 = 2 + 3 + 3$ ,  $9 = 3 + 3 + 3$ ,  $10 = 2 + 3 + 5$ ,  
 $11 = 2 + 2 + 7$ ,  $12 = 2 + 5 + 5$ ,  $13 = 3 + 3 + 7$ ,  
 $14 = 2 + 5 + 7$ ,  $15 = 3 + 5 + 7$ ,  $16 = 2 + 7 + 7$ ,  
 $17 = 5 + 5 + 7$ ,  $18 = 2 + 5 + 11$ ,  $19 = 3 + 5 + 11$ ,  
 $20 = 2 + 7 + 11$   
 92. The answer most people select is Denmark, kangaroo, and orange.

### Section 5.2, Page 225

- Begin at zero. Represent the first addend with an arrow. Draw the arrow to the right if the addend is positive, to the left if negative. From the tip of the first arrow, represent the second addend with a second arrow. The sum of the two integers is at the tip of the second arrow.
  - To rewrite a subtraction problem as an addition problem, rewrite the minus sign as a plus sign and change the second number to its opposite.
  - The quotient of two numbers with like signs is positive. The quotient of two numbers with unlike signs is negative.
7. 3 9. 2 11. -5 13. 2 15. -21 17. -3  
 19. -10 21. -2 23. -6 25. -2 27. -20

 41. -7 43. -15 45. -48

In Exercises 47–55, false answers can be modified in a variety of ways. We give one possible answer.

47. True  
 49. False; the difference of two negative integers may be a positive integer, a negative integer, or zero.

51. True 53. True  
 55. False; the sum of a positive integer and a negative integer may be a positive integer, a negative integer, or zero.  
 57. 6 59. -17 61. -12 63. -5 65. -6  
 67. -15, -10, -5, 0, 5, 10  
 69. -6, -5, -4, -3, -2, -1  
 71.  $213.8^\circ\text{F}$  73. 210 points 75. 1769 ft  
 77. a) 9 hours b) 2 hours 79. -1  
 81.  $0 + 1 - 2 + 3 + 4 - 5 + 6 - 7 - 8 + 9 = 1$

### Section 5.3, Page 238

- The set of rational numbers is the set of numbers of the form  $p/q$ , where  $p$  and  $q$  are integers and  $q \neq 0$ .
  - a) Divide both the numerator and the denominator by their greatest common factor.  
b)  $\frac{5}{9}$
  - For positive mixed numbers, multiply the denominator of the fraction by the integer preceding it. Add this product to the numerator. This sum is the numerator of the improper fraction; the denominator is the same as the denominator in the mixed number. For negative mixed numbers, temporarily ignore the negative sign, perform the conversion described above, and then add the negative sign.
  - The reciprocal of a number is 1 divided by the number.  
b)  $-\frac{1}{2}$
  - a) To add or subtract two fractions with a common denominator, perform the indicated operation on the numerators. Keep the common denominator. Reduce the new fraction to lowest terms, if possible.  
b)  $\frac{2}{3}$  c)  $\frac{1}{2}$
11. Answers will vary. 13.  $\frac{2}{3}$  15.  $\frac{2}{7}$  17.  $\frac{21}{32}$  19.  $\frac{7}{11}$

b)  $1\frac{1}{2}$  cup water (or milk) and  $\frac{3}{4}$  cup oatmeal

137. a)  $\frac{1}{8}$  b)  $\frac{1}{16}$  c) 5 d) 6

### Section 5.4, Page 247

1. A rational number can be written as a ratio of two integers. Real numbers that cannot be written as a ratio of two integers are irrational numbers.

3. A perfect square is any number that is the square of a natural number.

5. a) To add or subtract two or more square roots with the same radicand, add or subtract their coefficients and then multiply the sum or difference by the common radical.

b)  $-\sqrt{6}$

7. a) Multiply both the numerator and denominator by a radical that will result in the radicand in the denominator becoming a perfect square.

b)  $\frac{7\sqrt{3}}{3}$

9. Rational 11. Rational 13. Irrational 15. Rational

17. Irrational 19. 8 21. 10 23. -13 25. -15

27. -10 29. Rational number, integer, natural number

31. Rational number, integer, natural number

33. Rational number 35. Rational number

37. Rational number 39.  $3\sqrt{2}$  41.  $4\sqrt{3}$  43.  $3\sqrt{7}$

45.  $4\sqrt{5}$  47.  $9\sqrt{2}$  49.  $7\sqrt{6}$  51.  $5\sqrt{3}$  53.  $-13\sqrt{3}$

55.  $4\sqrt{3}$  57.  $23\sqrt{2}$  59. 4 61.  $2\sqrt{15}$  63.  $10\sqrt{2}$

65.  $\sqrt{2}$  67. 3 69.  $\frac{\sqrt{2}}{2}$  71.  $\frac{\sqrt{21}}{7}$  73.  $\frac{2\sqrt{15}}{3}$

75.  $\frac{3\sqrt{2}}{2}$  77.  $\frac{\sqrt{15}}{3}$

79.  $\sqrt{7}$  is between 2 and 3 since 7 is between 4 and 9.  $\sqrt{7}$  is between 2.5 and 3 since 7 is closer to 9 than to 4.  $\sqrt{7} \approx 2.65$ .

81.  $\sqrt{107}$  is between 10 and 11 since 107 is between 100 and 121.  $\sqrt{107}$  is between 10 and 10.5 since 107 is closer to 100 than to 121.  $\sqrt{107} \approx 10.34$ .

83.  $\sqrt{170}$  is between 13 and 14 since 170 is between 169 and 196.  $\sqrt{170}$  is between 13 and 13.5 since 170 is closer to 169 than to 196.  $\sqrt{170} \approx 13.04$ .

*In Exercises 85–89, false answers can be modified in a variety of ways. We give one possible answer.*

85. False.  $\sqrt{p}$  is an irrational number for any prime number  $p$ .

87. True

89. False. The product of a rational number and an irrational number may be a rational number or an irrational number.

91.  $\pi + (-\pi) = 0$  93.  $\sqrt{2} \cdot \sqrt{3} = \sqrt{6}$

95.  $\sqrt{5} \neq 2.236$  since  $\sqrt{5}$  is irrational and 2.236 is rational.

97. No.  $\pi$  is irrational; therefore, it cannot equal  $\frac{22}{7}$  or 3.14, both of which are rational.

99.  $\sqrt{4 \cdot 9} = \sqrt{4} \cdot \sqrt{9}$ ,  $\sqrt{36} = 2 \cdot 3$ ,  $6 = 6$

101. a) 10 mph b) 20 mph c) 40 mph d) 80 mph

103. a) If the result on the calculator is a terminating or repeating decimal number, then the number is rational; if the result is not a terminating or repeating decimal number, then the number is irrational.

b) Rational.  $\sqrt{0.04} = 0.2$ , which is a rational number.

c) Irrational.  $\sqrt{0.7} = 0.8366600265 \dots$  Since the decimal number is not a terminating or a repeating decimal number, this is an irrational number.

105. a)  $(44 \div \sqrt{4}) \div \sqrt{4} = 11$  b)  $(44 \div 4) + \sqrt{4} = 13$

c)  $4 + 4 + 4 + \sqrt{4} = 14$

d)  $\sqrt{4}(4 + 4) + \sqrt{4} = 18$

Other answers are possible.

### Section 5.5, Page 254

1. The real numbers are the union of the rational numbers and the irrational numbers.

3. If whenever the operation is performed on two elements of a set the result is also an element of the set, then the set is closed under that operation.

5.  $a + b = b + a$ , the order in which two numbers are added is immaterial. One example is  $4 + 5 = 5 + 4$ .

7.  $(a \cdot b) \cdot c = a \cdot (b \cdot c)$ , when multiplying three numbers, you may place parentheses around any two adjacent numbers. One example is  $(1 \times 2) \times 3 = 1 \times (2 \times 3)$ .

9. Yes 11. No 13. Yes 15. No 17. Yes 19. Yes

21. No 23. No 25. Yes 27. No

29. Commutative property of addition. The only difference between the expressions on both sides of the equal sign is the order of  $(3 + 4)$  and  $x$  being added.

31.  $(-3)(-4) = (-4)(-3) = 12$

33. No.  $3 \div 4 \neq 4 \div 3$ .

35.  $[(-2)(-3)](-4) = (-2)[(-3)(-4)] = -24$

37. No.  $(16 \div 8) \div 2 \neq 16 \div (8 \div 2)$ .

39. No.  $(81 \div 9) \div 3 \neq 81 \div (9 \div 3)$ .

41. Commutative property of addition

43. Associative property of multiplication

45. Associative property of addition

47. Commutative property of multiplication

49. Distributive property

51. Commutative property of addition

53. Distributive property

55. Commutative property of addition

57.  $2c + 14$  59.  $\frac{2}{3}x - 4$  61.  $3x + 4$  63.  $2x - 1$

65.  $15 - 3\sqrt{5}$  67.  $2 + \sqrt{6}$   
 69. a) Distributive property  
 b) Associative property of addition  
 71. a) Distributive property  
 b) Associative property of addition  
 c) Commutative property of addition  
 d) Associative property of addition  
 73. a) Distributive property  
 b) Commutative property of addition  
 c) Associative property of addition  
 d) Commutative property of addition  
 75. Yes 77. No 79. Yes 81. Yes 83. Yes 85. Yes  
 87. Yes 89. Answers will vary.  
 91. No.  $0 \div a = 0$  (when  $a \neq 0$ ), but  $a \div 0$  is undefined.  
 92. a) No b) No c) Answers will vary.

### Section 5.6, Page 264

- The 2 is the base and the 3 is the exponent or power.
- a) To multiply two exponential expressions with the same base, add the exponents and use this sum as the exponent on the common base.  
 b)  $2^3 \cdot 2^4 = 2^{3+4} = 2^7 = 128$
- a) Any nonzero expression raised to the power of 0 equals 1.  
 b)  $7^0 = 1$
- a) Any base with an exponent raised to another exponent is equal to the base raised to the product of the exponents.  
 b)  $(3^2)^4 = 3^{2 \cdot 4} = 3^8 = 6561$
- a)  $-1^{500}$  means  $-(1)^{500}$  or  $-1 \cdot 1^{500}$ . Since 1 raised to any power equals 1,  $-1^{500} = -1 \cdot 1^{500} = -1 \cdot 1 = -1$ .  
 b)  $(-1)^{500}$  means  $(-1)$  multiplied by itself 500 times. Since 500 is even,  $(-1)^{500} = 1$ .  
 c)  $-1^{501}$  means  $-(1)^{501}$  or  $-1 \cdot 1^{501}$ . Since 1 raised to any power equals 1,  $-1^{501} = -1 \cdot 1^{501} = -1 \cdot 1 = -1$ .  
 d)  $(-1)^{501}$  means  $(-1)$  multiplied by itself 501 times. Since 501 is odd,  $(-1)^{501} = -1$ .
- a) If the exponent is positive, move the decimal point in the number to the right the same number of places as the exponent, adding zeros where necessary. If the exponent is negative, move the decimal point in the number to the left the same number of places as the exponent, adding zeros where necessary.  
 b) 0.000576

### Section 5.8, Page 280

- The first and second terms are one. Each term thereafter is the sum of the previous two terms.
- a) The golden number is  $\frac{\sqrt{5} + 1}{2}$ .  
 b) When a line segment  $AB$  is divided at a point  $C$ , such that the ratio of the whole,  $AB$ , to the larger part,  $AC$ , is equal to the ratio of the larger part,  $AC$ , to the smaller part,  $CB$ , then each of the two ratios  $AB/AC$  and  $AC/CB$  is known as the golden ratio.  
 c) The proportion made by using the two golden ratios,  $AB/AC = AC/CB$ , is known as the golden proportion.  
 d) A golden rectangle is one where the ratio of the length to the width is equal to the golden number.
- Answers will vary. 7. a) 1.618 b) 0.618 c) 1  
 $\frac{1}{1} = 1, \frac{2}{1} = 2, \frac{3}{2} = 1.5, \frac{5}{3} \approx 1.667, \frac{8}{5} = 1.6, \frac{13}{8} = 1.625, \frac{21}{13} \approx 1.615, \frac{34}{21} \approx 1.619, \frac{55}{34} \approx 1.6176, \frac{89}{55} \approx 1.6182$ . The consecutive ratios alternate, increasing and decreasing about the golden ratio.
- Each number in the Fibonacci sequence is either a prime number or is relatively prime with the number preceding or succeeding it in the sequence. Therefore, the GCF of any two consecutive Fibonacci numbers is 1.

 41. \$426.25 43. 16,000,000 sec 45. 1.71 in.  
 47. The two expressions are not equal.

### Section 6.2, Page 302

- The parts that are added or subtracted in an algebraic expression are called terms. In  $3x - 2y$ , the  $3x$  and  $-2y$  are terms.
- The numerical part of a term is called its numerical coefficient. For the term  $3x$ , 3 is the numerical coefficient.
- To simplify an expression means to combine like terms by using the commutative, associative, and distributive properties.
- If  $a = b$ , then  $a - c = b - c$  for all real numbers  $a$ ,  $b$ , and  $c$ . If  $2x + 3 = 5$ , then  $2x + 3 - 3 = 5 - 3$ .
- If  $a = b$ , then  $a/c = b/c$  for all real numbers  $a$ ,  $b$ , and  $c$ , where  $c \neq 0$ . If  $4x = 8$ , then  $\frac{4x}{4} = \frac{8}{4}$ .
- A ratio is a quotient of two quantities. An example is  $\frac{7}{9}$ .
- Yes. They have the same variable and the same exponent on the variable.
- 11x 17.  $2x + 12$  19.  $3x + 11y$  21.  $-8x + 2$   
 23.  $-5x + 3$  25.  $13.3x - 8.3$  27.  $-\frac{2}{15}x - 4$   
 29.  $13x - 7y + 3$  31.  $8s - 17$  33.  $1.5x - 4.2$

 75. a) Answers will vary. b) -1  
 77. a) An equation that has no solution.  
b) You will obtain a false statement.  
 79. a) 2 : 5 b)  $m : m + n$

### Section 6.3, Page 311

- A formula is an equation that typically has a real-life application.
- Subscripts are numbers (or letters) placed below and to the right of variables. They are used to help clarify a formula.
- An exponential equation is of the form  $y = a^x$ ,  $a > 0$ ,  $a \neq 1$ .
- 20 9. 56 11. 25 13. 62.8 15. 37.1 17. 2

17.  $(x - 5)(x + 5)$

21.  $(x + 9)(x - 7)$

25.  $(4x + 1)(x + 3)$

29.  $(4x + 3)(x + 2)$

33.  $(3x + 4)(x - 6)$

39.  $-7, -3$

49.  $-9, 4$

59.  $3, -5$

67.  $2 \pm \sqrt{2}$

75.  $\frac{7}{3}, 1$

79. Width = 12 m, length = 22 m

81. a) The zero-factor property cannot be used.

b)  $\approx 8.37, \approx 2.63$

83.  $x^2 - 2x - 3 = 0$

15.  $(x - 7)(x - 3)$

19.  $(x + 7)(x - 4)$

23.  $(2x - 5)(x + 2)$

27.  $(5x + 2)(x + 2)$

31.  $(4x - 3)(x - 2)$

35.  $1, -2$  37.  $-\frac{4}{3}, \frac{1}{2}$

41.  $3, 1$  43.  $5, -3$  45.  $3, 1$  47.  $9, -9$

51.  $\frac{2}{3}, -4$  53.  $-\frac{1}{5}, -2$  55.  $\frac{1}{3}, 1$  57.  $\frac{1}{4}, 2$

61.  $6, -3$  63.  $9, -1$  65. No real solution

69.  $\frac{4 \pm \sqrt{13}}{3}$  71.  $\frac{1 \pm \sqrt{17}}{8}$  73.  $-1, -\frac{5}{2}$

77. No real solution

### Section 6.10, Page 372

1. A function is a special type of relation where each value of the independent variable corresponds to a unique value of the dependent variable.

3. The domain of a function is the set of values that can be used for the independent variable.

5. If a vertical line touches more than one point on the graph, then for each value of  $x$  there is not a unique value for  $y$  and the graph does not represent a function.

7. Not a function 9. Function, domain:  $\mathbb{R}$ ; range:  $\mathbb{R}$

11. Function, domain:  $\mathbb{R}$ ; range:  $y = 2$

13. Function, domain:  $\mathbb{R}$ ; range:  $y \geq -4$

15. Not a function

17. Function, domain:  $0 \leq x < 12$ ; range:  $y = 1, 2, 3$

19. Not a function

21. Function, domain:  $\mathbb{R}$ ; range:  $y > 0$

23. Not a function

25. Yes 27. No 29. Yes 31. 5 33. 1 35. -6

## Chapter 7

### Section 7.1, Page 388

- Two or more linear equations form a system of linear equations.
- A consistent system of equations is a system that has a solution.
- An inconsistent system of equations is one that has no solution.
- The graphs of the equations will be parallel.
- The graphs of the equations will be the same line.
- Yes:  $(3, 0)$ ; no:  $(2, -2)$ ,  $(1, 2)$

29.

31.

33. a) One unique solution; the lines intersect at one and only one point.

b) No solution; the lines do not intersect.

c) Infinitely many solutions; the lines coincide.

35. An infinite number of solutions 37. One solution

39. No solution 41. An infinite number of solutions

43. No solution 45. One solution

47. Not perpendicular 49. Perpendicular

51. a) Tom's Tree and Landscape:  $C = 60h + 200$   
Lawn Perfect:  $C = 25h + 305$

c) 3 hours

53. a)  $C = 15x + 400$   
 $R = 25x$

c) 40 backpacks d)  $P = 10x - 400$

e) Loss of \$100 f) 140 backpacks

55. a)  $C = 155x + 8400$ ,  $R = 225x$

c) 120 units d)  $P = 70x - 8400$

e) Loss of \$1400 f) 138 units

57. a) Job 1:  $s = 0.15x + 300$

Job 2:  $s = 450$

c) \$1000 sales volume

59. a) One b) Three c) Six d) Ten

e) To find the number of points of intersection for  $n$  lines, add  $n - 1$  to the number of points of intersection for  $n - 1$  lines. For example, for 5 lines there were 10 points of intersection. Therefore, for 6 lines ( $n = 6$ ) there are  $10 + (6 - 1) = 15$  points of intersection.

## Section 7.2, Page 399

1. Answers will vary.

3. The system is dependent if the same value is obtained on both sides of the equal sign.

5.  $x$ , in the first equation 7.  $(-1, 6)$  9.  $(0, 2)$

11. No solution; inconsistent system 13.  $(-2, \frac{8}{5})$

15. An infinite number of solutions; dependent system

17.  $(-3, -6)$  19.  $(\frac{11}{5}, -\frac{13}{5})$  21.  $(-\frac{1}{5}, -\frac{8}{5})$

23. No solution; inconsistent system

25.  $(2, 4)$  27.  $(6, 4)$  29.  $(-2, 0)$  31.  $(-4, 5)$

33.  $(3, 5)$  35.  $(1, -2)$

37. No solution; inconsistent system 39.  $(2, -1)$

41.  $s = 12,000 + 0.15p$

$s = 27,000 + 0.05p$

\$150,000 annual profit

43.  $m + l = 50$   
 $10.95m + 14.95l = 663.50$   
 21 medium, 29 large
45.  $x + y = 10$   
 $0.25x + 0.50y = 0.40(10)$   
 4ℓ of 25%, 6ℓ of 50%
47.  $y = 18 + 0.02x$   
 $y = 24 + 0.015x$   
 1200 copies
49.  $x + y = 20$   
 $3x + y = 30$   
 Mix 5 lb of nuts with 15 lb of pretzels.
51.  $x + y = 250$   
 $2x + 5y = 950$   
 100 student tickets and 150 nonstudent tickets
53.  $\approx 26.7$  years after 1981 or in 2007
55.  $(\frac{1}{2}, \frac{1}{3})$  57.–59. Answers will vary.

### Section 7.3, page 408

1. A matrix is a rectangular array of elements.
3. A square matrix contains the same number of rows and columns.
5. 2 7. a) Answers will vary. b)  $\begin{bmatrix} 4 & 9 & -7 \\ 2 & 4 & 9 \end{bmatrix}$
9. a) The number of columns of the first matrix must be the same as the number of rows of the second matrix.  
 b)  $2 \times 3$
11. a)  $I = \begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix}$  b)  $I = \begin{bmatrix} 1 & 0 & 0 \\ 0 & 1 & 0 \\ 0 & 0 & 1 \end{bmatrix}$
13.  $\begin{bmatrix} -4 & 2 \\ 12 & 9 \end{bmatrix}$  15.  $\begin{bmatrix} 0 & 4 \\ 4 & 4 \\ 5 & -1 \end{bmatrix}$
17.  $\begin{bmatrix} 6 & -7 \\ -12 & 4 \end{bmatrix}$  19.  $\begin{bmatrix} 2 & 11 \\ 16 & 13 \\ -2 & 2 \end{bmatrix}$
21.  $\begin{bmatrix} 6 & 4 \\ 10 & 0 \end{bmatrix}$  23.  $\begin{bmatrix} 0 & 13 \\ 22 & 0 \end{bmatrix}$
25.  $\begin{bmatrix} 13 & 0 \\ 7 & 0 \end{bmatrix}$  27.  $\begin{bmatrix} 4 & 12 \\ 14 & 22 \end{bmatrix}$
29.  $\begin{bmatrix} 15 \\ 22 \end{bmatrix}$  31.  $\begin{bmatrix} 4 & 7 & 6 \\ -2 & 3 & 1 \\ 5 & 1 & 2 \end{bmatrix}$
33.  $A + B = \begin{bmatrix} 6 & 2 & 1 \\ 6 & -2 & 4 \end{bmatrix}$ ; cannot be multiplied
35. Cannot be added;  $A \times B = \begin{bmatrix} 26 & 38 \\ 24 & 24 \end{bmatrix}$

37. Cannot be added;  $\begin{bmatrix} 1 \\ -1 \end{bmatrix}$
39.  $A + B = B + A = \begin{bmatrix} 5 & 7 \\ 8 & 4 \end{bmatrix}$
41.  $A + B = B + A = \begin{bmatrix} 8 & 0 \\ 6 & -8 \end{bmatrix}$
43.  $(A + B) + C = A + (B + C) = \begin{bmatrix} 7 & 10 \\ 6 & 13 \end{bmatrix}$
45.  $(A + B) + C = A + (B + C) = \begin{bmatrix} 5 & 5 \\ 7 & -37 \end{bmatrix}$
47. No 49. No 51. Yes
53.  $(A \times B) \times C = A \times (B \times C) = \begin{bmatrix} 41 & 13 \\ 56 & 16 \end{bmatrix}$
55.  $(A \times B) \times C = A \times (B \times C) = \begin{bmatrix} 16 & -10 \\ -24 & 2 \end{bmatrix}$
57.  $(A \times B) \times C = A \times (B \times C) = \begin{bmatrix} 17 & 0 \\ -7 & 0 \end{bmatrix}$
59. Large Small 61. [\$36.04 \$47.52]
- $\begin{bmatrix} 38 & 50 \\ 56 & 72 \\ 17 & 26 \\ 10 & 14 \end{bmatrix}$
63. Answers will vary. 65. Yes 67. False
69. a) \$28.70 b) \$60.10 c)  $\begin{bmatrix} 28.7 & 24.6 \\ 41.3 & 35.7 \\ 69.3 & 60.1 \end{bmatrix}$
71. Yes. Answers will vary. One example is
- $A = \begin{bmatrix} 2 & 7 & 6 \\ -3 & 0 & 8 \end{bmatrix}, B = \begin{bmatrix} 1 & 2 \\ 3 & 4 \\ 5 & 6 \end{bmatrix}$

### Section 7.4, Page 417

1. a) An augmented matrix is a matrix formed with the coefficients of the variables and the constants. The coefficients of the variables are separated from the constants by a vertical bar.
- b)  $\begin{bmatrix} 1 & 3 & 7 \\ 2 & -1 & 4 \end{bmatrix}$
3. If you obtain an augmented matrix in which one row of numbers on the left side of the vertical line are all zeroes but a zero does not appear in the same row on the right side of the vertical line, the system is inconsistent.
5. Change the  $-2$  to a  $1$  by multiplying the numbers in the second row by  $-\frac{1}{2}$ .
7. (3, 0) 9. (3, 2)
11. An infinite number of solutions; dependent system

13.  $(\frac{7}{2}, -1)$  15.  $(\frac{1}{2}, -6)$   
 17. No solution; inconsistent system 19. (3, 5)  
 21. 20 small flags and 35 large flags  
 23. Truck driver:  $7\frac{1}{9}$  hours; laborer:  $9\frac{1}{9}$  hours  
 25. Nonrefillable pencils: 125; refillable pencils: 75

### Section 7.5, Page 420

1. The solution set of a system of linear inequalities is the set of points that satisfy all inequalities in the system.

19. a)  $P \geq 2S$ ,  $P \geq 10$ ,  $S \geq 5$ ,  $600P + 900S \leq 18,000$

- c) One example is (15, 6); \$14,400 of inventory cost

21. a) No b) One example:  $x + y > 4$   
 $x + y < 1$

23. No, every line divides the plane into two half planes, only one of which can be part of the solution.

25. Answers will vary.

### Section 7.6, Page 426

1. Constraints are restrictions that are represented as linear inequalities.

3. Vertices 5. Answers will vary.

7. Maximum is 30 at (5, 0), minimum is 0 at (0, 0).

9. a)

b) Maximum is 23 at (3, 2), minimum is 0 at (0, 0).

11. a)

b) Maximum is 28 at (4, 0), minimum is 0 at (0, 0).

13. a)

b) Maximum is  $\approx 25.12$  at  $(\frac{32}{3}, 1)$ , minimum is 6.6 at  $(\frac{9}{4}, 1)$  or  $(2, \frac{4}{3})$ .

15. a)  $x + y \leq 24$ ,  $x \geq 2y$ ,  $y \geq 4$ ,  $x \geq 0$ ,  $y \geq 0$

b)  $P = 0.35x + 0.50y$

c)

d) (8, 4), (16, 8), (20, 4)

e) 16 rolls of Kodak and 8 rolls of Fuji

f) \$9.60

17. a)  $3x + 4y \geq 60$ ,  $10x + 5y \geq 100$ ,  $x \geq 0$ ,  $y \geq 0$

b)  $C = 28x + 33y$

c)

d) (0, 20), (4, 12), (20, 0)

e) 4 hours for Machine I and 12 hours for Machine II

f) \$508

19. Three car seats and seven strollers, \$320

### Review Exercises, Page 428

28.  $(1, 0)$  29.  $(\frac{12}{11}, \frac{7}{11})$  30.  $(1, 2)$

31. \$350,000 at 8%, \$250,000 at 10%

32. Mix  $83\frac{1}{3}\ell$  of 80% acid solution with  $16\frac{2}{3}\ell$  of 50% acid solution.

33. \$500 salary, 4% commission rate

34. a) 32.5 months b) Model 6070B

35. a) 3 hr b) All-Day parking lot

36.

37.

38.

39.

40. The maximum is 54 at  $(9, 0)$ .

### Chapter Test, Page 429

1. If the lines do not intersect (are parallel) the system of equations is inconsistent. The system of equations is consistent if the lines intersect. If both equations represent the same line, then the system of equations is dependent.

2.

3. One solution 4.  $(2, -3)$  5.  $(-2, -3)$

6.  $(3, -1)$  7.  $(-1, 3)$  8.  $(2, 0)$

9.  $(-2, 2)$

10.  $\begin{bmatrix} 1 & -8 \\ 6 & 5 \end{bmatrix}$

11.  $\begin{bmatrix} 7 & -12 \\ -2 & 7 \end{bmatrix}$

12.  $\begin{bmatrix} -27 & -16 \\ 14 & 3 \end{bmatrix}$

13.

14. 20 lb at \$7.50, 10 lb at \$6.00

15. a) 40 checks b) Citrus Bank

16. a)

b) Maximum is 18.75 at  $(3.75, 0)$ , minimum is 0 at  $(0, 0)$ .

## Chapter 8

## Section 8.1, Page 437

1. The metric system
3. It is the standard of measurement accepted worldwide. There is only one basic unit of measurement for each quantity. It is based on the number 10, which makes many calculations easier than the U.S. customary system.
5. a) Answers will vary. b) 0.007 146 km  
c) 30 800 dm
7. Answers will vary.
9. a) 100 times greater b) 100 dm c) 0.01 dam
11. 2 13. 5 15. 22 17. (d) 19. (c) 21. (f)
23. a) 10 b)  $\frac{1}{100}$  c)  $\frac{1}{1000}$  d)  $\frac{1}{10}$  e) 1000 f) 100
25. mg;  $\frac{1}{1000}$  g 27. dg;  $\frac{1}{10}$  g 29. hg; 100 g

### Review Exercises, Page 469

1.  $\frac{1}{100}$  of base unit 2.  $1000 \times$  base unit  
 3.  $\frac{1}{1000}$  of base unit 4.  $100 \times$  base unit  
 5. 10 times base unit 6.  $\frac{1}{10}$  of base unit 7.  $0.20 \text{ g}$   
 8.  $320 \text{ c}\ell$  9.  $0.004 \text{ mm}$  10.  $1 \text{ kg}$  11.  $4620 \ell$   
 12.  $19\,260 \text{ dg}$  13.  $3000 \text{ mL}$ ,  $14\,630 \text{ c}\ell$ ,  $2.67 \text{ k}\ell$   
 14.  $0.047 \text{ km}$ ,  $47\,000 \text{ cm}$ ,  $4700 \text{ m}$  15. Centimeters  
 16. Grams 17. Degrees Celsius  
 18. Millimeters or centimeters 19. Square meters  
 20. Milliliters or cubic centimeters 21. Millimeters  
 22. Kilograms or tonnes 23. Kilometers  
 24. Meters or centimeters 25. a) and b) Answers will vary.  
 26. a) and b) Answers will vary. 27. (c) 28. (b) 29. (c)  
 30. (a) 31. (a) 32. (b) 33.  $2.5 \text{ t}$  34.  $6\,300\,000 \text{ g}$   
 35.  $64.4^\circ\text{F}$  36.  $20^\circ\text{C}$  37.  $\approx -21.1^\circ\text{C}$  38.  $102.2^\circ\text{F}$   
 39.  $l = 4 \text{ cm}$ ,  $w = 1.6 \text{ cm}$ ,  $A = 6.4 \text{ cm}^2$   
 40.  $r = 1.5 \text{ cm}$ ,  $A \approx 7.07 \text{ cm}^2$   
 41. a)  $80 \text{ m}^3$  b)  $80\,000 \text{ kg}$   
 42. a)  $660 \text{ m}^2$  b)  $0.000\,66 \text{ km}^2$   
 43. a)  $96\,000 \text{ cm}^3$  b)  $0.096 \text{ m}^3$   
 c)  $96\,000 \text{ mL}$  d)  $0.096 \text{ k}\ell$   
 44. 10,000 times larger 45.  $\approx 7.87 \text{ in.}$  46.  $\approx 233.33 \text{ lb}$   
 47.  $74.7 \text{ m}$  48.  $\approx 111.11 \text{ yd}$  49.  $72 \text{ kph}$  50.  $\approx 42.11 \text{ qt}$

51.  $57 \ell$  52.  $\approx 52.63 \text{ yd}^3$  53.  $\approx 12.77 \text{ in.}^2$  54.  $3.8 \ell$   
 55.  $11.4 \text{ m}^3$  56.  $99.2 \text{ km}$  57.  $0.9 \text{ ft}$  58.  $82.55 \text{ mm}$   
 59. a)  $1050 \text{ kg}$  b)  $\approx 2333.33 \text{ lb}$  60.  $32.4 \text{ m}^2$   
 61. a)  $190 \text{ k}\ell$  b)  $190\,000 \text{ kg}$   
 62. a)  $56 \text{ kph}$  b)  $56\,000 \text{ meters per hour}$   
 63. a)  $252 \ell$  b)  $252 \text{ kg}$   
 64.  $\$1.58$  per pound

### Chapter Test, Page 471

1.  $0.204 \text{ da}\ell$  2.  $123\,000\,000 \text{ mm}$  3. 100 times greater  
 4.  $2.4 \text{ km}$  5. (b) 6. (a) 7. (c) 8. (c) 9. (b)  
 10. 10,000 times greater 11. 1,000,000,000 times greater  
 12.  $1148.08 \text{ cm}$  13.  $\approx 166.67 \text{ yd}$  14.  $\approx -23.33^\circ\text{C}$   
 15.  $68^\circ\text{F}$   
 16.  $360 \text{ cm}$  or  $365.76 \text{ cm}$ , depending on which conversion factor you used  
 17. a)  $3200 \text{ m}^3$  b)  $3\,200\,000 \ell$  (or  $3200 \text{ k}\ell$ )  
 c)  $3\,200\,000 \text{ kg}$   
 18.  $\$245$

### Chapter 9

#### Section 9.1, Page 482

1. a) Undefined terms, definitions, postulates (axioms), and theorems  
 b) First, Euclid introduced undefined terms. Second, he introduced certain definitions. Third, he stated primitive propositions called postulates about the undefined terms and definitions. Fourth, he proved, using deductive reasoning, other propositions called theorems.  
 3. Two lines in the same plane that do not intersect are parallel lines.  
 5. Two angles in the same plane are adjacent angles when they have a common vertex and a common side but no common interior points.  
 7. Two angles the sum of whose measure is  $90^\circ$  are called complementary angles.  
 9. An angle whose measure is greater than  $90^\circ$  but less than  $180^\circ$  is an obtuse angle.  
 11. An angle whose measure is  $90^\circ$  is a right angle.  
 13. Half line,  $\overrightarrow{AB}$  15. Line segment,  $\overline{AB}$  17. Line,  $\overleftrightarrow{AB}$   
 19. Open line segment,  $\overline{AB}$  21.  $\overline{BD}$  23.  $\overline{BD}$   
 25.  $\{B, F\}$  27.  $\{C\}$  29.  $\overline{BC}$  31.  $\overrightarrow{BC}$  33.  $\emptyset$   
 35.  $\overline{BC}$  37.  $\angle ABE$  39.  $\angle EBC$  41.  $\overrightarrow{AC}$  43.  $\overline{BE}$   
 45. Obtuse 47. Straight 49. Right 51. None of these  
 53.  $71^\circ$  55.  $57\frac{1}{4}^\circ$  57.  $25.3^\circ$  59.  $89^\circ$  61.  $159.5^\circ$   
 63.  $136\frac{2}{7}^\circ$  65. (d) 67. (c) 69. (e)

71.  $m\angle 1 = 47^\circ$ ,  $m\angle 2 = 43^\circ$   
 73.  $134^\circ$  and  $46^\circ$   
 75. Angles 3, 4, and 7 each measure  $125^\circ$ ; angles 1, 2, 5, and 6 each measure  $55^\circ$ .  
 77. Angles 2, 5, and 6 each measure  $25^\circ$ ; angles 1, 3, 4, and 7 each measure  $155^\circ$ .  
 79.  $m\angle 1 = 70^\circ$ ,  $m\angle 2 = 20^\circ$   
 81.  $m\angle 1 = 33^\circ$ ,  $m\angle 2 = 57^\circ$   
 83.  $m\angle 1 = 115^\circ$ ,  $m\angle 2 = 65^\circ$   
 85.  $m\angle 1 = 29^\circ$ ,  $m\angle 2 = 151^\circ$   
 87. a) An infinite number b) An infinite number  
 89. An infinite number

For Exercises 91–97, the answers given are one of many possible answers.

91. Plane  $ABG$  and plane  $JCD$   
 93.  $\overleftrightarrow{BG}$  and  $\overleftrightarrow{DG}$   
 95. Plane  $AGB \cap$  plane  $ABC \cap$  plane  $BCD = \{B\}$   
 97.  $\overleftrightarrow{BC} \cap$  plane  $ABG = \{B\}$   
 99. Always true. If any two lines are parallel to a third line, then they must be parallel to each other.  
 101. Sometimes true. Vertical angles are only complementary when each is equal to  $45^\circ$ .  
 103. Sometimes true. Alternate interior angles are only complementary when each is equal to  $45^\circ$ .  
 105. No. Line  $m$  and line  $n$  may intersect.

107.

109. a)

Other answers are possible.

- b)  $30^\circ$  c)  $60^\circ$  d)  $90^\circ$

### Section 9.2, Page 491

1. A polygon is a closed figure in a plane determined by three or more straight line segments.  
 3. The different types of triangles are acute, obtuse, right, isosceles, equilateral, and scalene. Descriptions will vary.

5. If the corresponding sides of two similar figures are the same length, the figures are congruent figures.

7. a) Rectangle b) Not regular  
 9. a) Hexagon b) Regular  
 11. a) Rhombus b) Not regular  
 13. a) Octagon b) Not regular  
 15. a) Scalene b) Right  
 17. a) Isosceles b) Obtuse  
 19. a) Equilateral b) Acute  
 21. a) Scalene b) Obtuse  
 23. Parallelogram 25. Rhombus 27. Trapezoid  
 29.  $17^\circ$  31.  $150^\circ$

33.  $m\angle 1 = 50^\circ$ ,  $m\angle 2 = 63^\circ$ ,  $m\angle 3 = 67^\circ$ ,  $m\angle 4 = 67^\circ$ ,  
 $m\angle 5 = 50^\circ$ ,  $m\angle 6 = 113^\circ$ ,  $m\angle 7 = 50^\circ$ ,  $m\angle 8 = 130^\circ$ ,  
 $m\angle 9 = 67^\circ$ ,  $m\angle 10 = 113^\circ$ ,  $m\angle 11 = 130^\circ$ ,  $m\angle 12 = 50^\circ$   
 35.  $540^\circ$  37.  $720^\circ$  39.  $3240^\circ$  41. a)  $60^\circ$  b)  $120^\circ$   
 43. a)  $135^\circ$  b)  $45^\circ$  45. a)  $150^\circ$  b)  $30^\circ$   
 47.  $x = 6$ ,  $y = \frac{16}{5}$  49.  $x = \frac{12}{5}$ ,  $y = \frac{15}{2}$   
 51.  $x = 1.2$ ,  $y = 0.625$  53. 6 55.  $\frac{20}{3}$  57. 14 59. 28  
 61.  $28^\circ$  63. 8 65. 16 67.  $70^\circ$  69.  $55^\circ$  71.  $35^\circ$   
 73. 70 ft 75. a) 246.25 mi b) 270.875 mi  
 77.  $\overline{D'E'} = 4$ ,  $\overline{E'F'} = 5$ ,  $\overline{D'F'} = 3$   
 79. a)  $m\angle HMF = m\angle TMB$ ,  $m\angle HFM = m\angle TBM$ ,  
 $m\angle MHF = m\angle MTB$   
 b) 44 ft

### Section 9.3, Page 503

Throughout this section, we used the  $\pi$  key on a scientific calculator to determine answers in calculations involving  $\pi$ . If you use 3.14 for  $\pi$ , your answers may vary slightly.

1. a) Answers will vary.  
 b) Answers will vary.  
 c) 6

The area of this rectangle is 12 square units. The perimeter of this rectangle is 16 units.

3. a) To determine the number of square inches, multiply the number of square feet by 144.  
 b) To determine the number of square feet, divide the number of square inches by 144.  
 5.  $35 \text{ in.}^2$  7.  $17.5 \text{ cm}^2$   
 9. Area =  $105 \text{ ft}^2$ ; perimeter = 44 ft  
 11. Area =  $6000 \text{ cm}^2$ ; perimeter = 654 cm  
 13. Area =  $288 \text{ in.}^2$ ; perimeter = 74 in.  
 15.  $\approx 153.94 \text{ in.}^2$ , 43.98 in.

17.  $\approx 63.62 \text{ ft}^2$ ,  $28.27 \text{ ft}$   
 19. a) 9 in. b) 36 in. c)  $54 \text{ in.}^2$   
 21. a) 26 cm b) 60 cm c)  $120 \text{ cm}^2$

### Section 9.4, Page 515

Throughout this section, we used the  $\pi$  key on a scientific calculator to determine answers in calculations involving  $\pi$ . If you use 3.14 for  $\pi$ , your answers may vary slightly.

1. Volume is a measure of the capacity of a figure.
3. A polyhedron is a closed surface formed by the union of polygonal regions. A regular polyhedron is one whose faces are all regular polygons of the same size and shape.
5. Answers will vary. 7.  $27 \text{ ft}^3$  9.  $150.80 \text{ in.}^3$
11.  $131.95 \text{ cm}^3$  13.  $2400 \text{ in.}^3$  15.  $381.70 \text{ cm}^3$
17.  $524.33 \text{ cm}^3$  19.  $106.67 \text{ in.}^3$  21.  $59.43 \text{ m}^3$
23.  $30.49 \text{ ft}^3$  25.  $31.42 \text{ m}^3$  27.  $24 \text{ ft}^3$  29.  $189 \text{ ft}^3$
31.  $\approx 5.67 \text{ yd}^3$  33.  $5,900,000 \text{ cm}^3$  35.  $3 \text{ m}^3$
37. a)  $28,750 \text{ in.}^3$  b)  $\approx 16.64 \text{ ft}^3$  39.  $\approx 2.50 \text{ qt}$
41. a) The container with the larger diameter holds more.  
b)  $\approx 188.50 \text{ in.}^3$
43.  $82,944,000 \text{ ft}^3$  45.  $\approx 283.04 \text{ in.}^3$
47. a)  $\approx 323.98 \text{ in.}^3$  b)  $\approx 0.19 \text{ ft}^3$
49. a) Round pan base  $\approx 63.62 \text{ in.}^2$ ; rectangular pan base =  $63 \text{ in.}^2$   
b) Round pan volume  $\approx 127.24 \text{ in.}^3$ ; rectangular pan volume =  $126 \text{ in.}^3$   
c) Round pan
51. a)  $4320 \text{ in.}^3$  b)  $2.5 \text{ ft}^3$  53. Nine edges
55. Six vertices 57. Fourteen edges 59.  $\approx 21.46\%$
61. a)–e) Answers will vary.  
f) If we double the radius of a sphere, the new volume will be eight times the original volume.
63. a) Answers will vary.  
b)  $V_1 = a^3$ ;  $V_2 = a^2b$ ;  $V_3 = a^2b$ ;  $V_4 = ab^2$ ;  
 $V_5 = a^2b$ ;  $V_6 = ab^2$ ;  $V_7 = b^3$   
c)  $ab^2$
64. a)  $330 \text{ in.}^3$  b)  $\approx 300.84 \text{ in.}^3$

### Section 9.5, Page 532

1. The act of moving a geometric figure from some starting position to some ending position without altering its shape

or size is called rigid motion. The four main rigid motions studied in this section are reflections, translations, rotations, and glide reflections.

3. A reflection is a rigid motion that moves a figure to a new position that is a mirror image of the figure in the starting position.
5. A translation is a rigid motion that moves a figure by sliding it along a straight line segment in the plane.
7. A rotation is a rigid motion performed by rotating a figure in the plane about a specific point.
9. A glide reflection is a rigid motion formed by performing a translation (or glide) followed by a reflection.
11. A geometric figure is said to have reflective symmetry if the positions of a figure before and after a reflection are identical (except for vertex labels).
13. A tessellation is a pattern consisting of the repeated use of the same geometric figures to entirely cover a plane, leaving no gaps.

This figure contains the answers for Exercises 15 and 16.

This figure contains the answers for Exercises 17 and 18.

This figure contains the answers for Exercises 19 and 20.

This figure contains the answers for Exercises 21 and 22.

This figure contains the answers to Exercises 23 and 24.

This figure contains the answers to Exercises 25 and 26.

This figure contains the answers to Exercises 27 and 28.

This figure contains the answers to Exercises 31 and 32.

This figure contains the answers to Exercises 33 and 34.

This figure contains the answers to Exercises 35 and 36.

This figure contains the answers to Exercises 37 and 38.

This figure contains the answers to Exercises 39 and 40.

This figure contains the answers to Exercises 41 and 42.

This figure contains the answers to Exercises 43 and 44.

This figure contains the answers to Exercises 45 and 46.

47. a)

b) Yes

c) Yes

49. a)

b) No

c) No

51. a)

b) No

c) No

d)

e) Yes

f) Yes

53. a)–c)

d) No. Any 90° rotation will result in the figure being in a different position than the starting position.

55. a)–b)

c) No.

d) The order in which the translation and the reflection are performed is important. The figure obtained in part (a) is the glide reflection.

57. Answers will vary.

59. a) Answers will vary.

b) A regular pentagon cannot be used as a tessellating shape.

60. Although answers will vary depending on the font, the following capital letters have reflective symmetry about a horizontal line drawn through the center of the letter: B, C, D, E, H, I, K, O, X.

61. Although answers will vary depending on the font, the following capital letters have reflective symmetry about a vertical line drawn through the center of the letter: A, H, I, M, O, T, U, V, W, X, Y.

 62. Although answers will vary depending on the font, the following capital letters have  $180^\circ$  rotational symmetry about a point in the center of the letter: H, I, O, S, X, Z.

### Section 9.6, Page 542

1. Topology is sometimes referred to as “rubber sheet geometry” because it deals with bending and stretching of geometric figures.
3. Take a strip of paper, give one end a half twist, and tape the ends together.
5. Four
7. A Jordan curve is a topological object that can be thought of as a circle twisted out of shape.
9. The number of holes in the object determines the genus of an object.
- 11.–19. Answers will vary. 21. Outside 23. Outside
25. Outside 27. Inside 29. 1 31. 1 33. Larger than 5
35. 5 37. 0 39. 5 41. a)–d) Answers will vary.
43. One 45. Two
47. The smaller one is a Möbius strip; the larger one is not.
49. Yes. “Both sides” of the belt experience wear.
51. Answers will vary.
53. a) 1 b) 1 c) Answers will vary.

### Section 9.7, Page 552

1.–5. Answers will vary.

 7. a) *Euclidean*: Given a line and a point not on the line, one and only one line can be drawn parallel to the given line through the given point.

 b) *Elliptical*: Given a line and a point not on the line, no line can be drawn through the given point parallel to the given line.

 c) *Hyperbolic*: Given a line and a point not on the line, two or more lines can be drawn through the given point parallel to the given line.

9. A plane 11. A pseudosphere

13. Spherical: elliptical geometry; flat: Euclidean geometry; saddle-shaped: hyperbolic geometry

15.

17.

19. a)

- b) Infinite
- c) Finite

### Review Exercises, Page 554

In the Review Exercises and Chapter Test questions, the  $\pi$  key on the calculator is used to determine answers in calculations involving  $\pi$ . If you use 3.14 for  $\pi$ , your answers may vary slightly.

1.  $\{F\}$  2.  $\triangle BFC$  3.  $\overleftrightarrow{BC}$  4.  $\overleftrightarrow{BH}$  5.  $\{F\}$
6.  $\{ \}$  7.  $38.8^\circ$  8.  $55.3^\circ$  9. 10.2 in. 10. 2 in.
11.  $58^\circ$  12.  $92^\circ$
13.  $m\angle 1 = 70^\circ$ ,  $m\angle 2 = 60^\circ$ ,  $m\angle 3 = 120^\circ$ ,  $m\angle 4 = 70^\circ$ ,  $m\angle 5 = 110^\circ$ ,  $m\angle 6 = 70^\circ$
14.  $720^\circ$  15.  $63 \text{ cm}^2$  16.  $35 \text{ in.}^2$  17.  $13 \text{ in.}^2$

20. Answers will vary.

21. Euclidean: Given a line and a point not on the line, one and only one line can be drawn parallel to the given line through the given point. Elliptical: Given a line and a point not on the line, no line can be drawn through the given point parallel to the given line. Hyperbolic: Given a line and a point not on the line, two or more lines can be drawn through the given point parallel to the given line.

## Chapter 10

### Section 10.1, Page 566

- A binary operation is an operation, or rule, that can be performed on two and only two elements of a set. The result is a single element.
- When we add two numbers, the sum is one number:  $4 + 5 = 9$ .
  - When we subtract two numbers, the difference is one number:  $5 - 4 = 1$ .
  - When we multiply two numbers, the product is one number:  $5 \times 4 = 20$ .
  - When we divide two numbers, the quotient is one number:  $20 \div 5 = 4$ .
- A mathematical system is a commutative group if all five of the following conditions hold.
  - The set of elements is closed under the given operation.
  - An identity element exists for the set.
  - Every element in the set has an inverse.
  - The set of elements is associative under the given operation.
  - The set of elements is commutative under the given operation.
- If a binary operation is performed on any two elements of a set and the result is an element of the set, then that set is *closed* under the given binary operation. For all integers  $a$  and  $b$ ,  $a + b$  is an integer. Therefore, the set of integers is closed under the operation of addition.
- When a binary operation is performed on two elements in a set and the result is the identity element for the binary operation, then each element is said to be the *inverse* of the other. For the set of rational numbers, the additive inverse of 2 is  $-2$  since  $2 + (-2) = 0$  and the multiplicative inverse of 2 is  $\frac{1}{2}$  since  $2 \times \frac{1}{2} = 1$ .

11. No; every commutative group is also a group.

13. d); The commutative property need not apply.

15.  $(a + b) + c = a + (b + c)$ , for any elements  $a$ ,  $b$ , and  $c$ ;  $(3 + 4) + 5 = 3 + (4 + 5)$

17.  $a \cdot b = b \cdot a$  for any elements  $a$  and  $b$ ;  $2 \cdot 3 = 3 \cdot 2$

19.  $4 \div 2 \neq 2 \div 4$

21.  $(6 - 4) - 1 \neq 6 - (4 - 1)$

$$2 - 1 \neq 6 - 3$$

$$1 \neq 3$$

23. No; there is no identity element.

25. Yes; satisfies the five properties needed.

27. No; the system is not closed.

29. No; there is no identity element.

31. No; not all elements have inverses.

33. Yes; satisfies the four properties needed.

35. No; the system is not closed. For example,  $\frac{1}{0}$  is undefined.

37. No; does not satisfy the associative property.

39. No; the system is not closed. For example,  $\sqrt{2} + (-\sqrt{2}) = 0$ , which is rational. There is also no identity element.

41. Yes 43. Answers will vary. 44.  $(9^9)^9$  45. 20

### Section 10.2, Page 574

- Numbers are obtained by starting at the first addend (on a clock face), then moving clockwise the number of hours equal to the second addend.
- Add 4 + 10 to get 2, then add 2 + 3.
  - 5
- Add 12 to 5 to get 17 - 9.
  - 8
  - Since 12 is the identity element, you can add 12 to any number without changing the answer.
- Yes, the sum of any two numbers in clock 12 arithmetic is a number in clock 12 arithmetic.
- Yes; 1:11, 2:10, 3:9, 4:8, 5:7, 6:6, 7:5, 8:4, 9:3, 10:2, 11:1, and 12:12
- Yes,  $6 + 9 = 9 + 6$  since both equal 3
- 5
  3. If you add 5 to any number, then you get the number you started with. Thus, in clock 5 arithmetic, 5 is the identity element. Three is the additive inverse of 2 since  $2 + 3 = 5$ .
- Yes; the elements are symmetric about the main diagonal.
- Yes; C is the identity element since the row next to C is identical to the top row and the column under C is identical to the left-hand column.
- The inverse of A is B since  $A \odot B = C$  and  $B \odot A = C$ .
- 11 23. 5 25. 4 27. 8 29. 6 31. 6 33. 3 35. 4
- 7 39. 1 41. 12 43. 12

45.

+	1	2	3	4	5	6

7	1	2	3	4	5	6	7

57. 4    59. 6    61. 4    63. 7

65. Yes; it satisfies the five required properties.

67. a)  $\{0, 1, 2, 3\}$ b) 

c) Yes

d) Yes; 0

e) Yes; 0-0, 1-3, 2-2, 3-1

f)  $(2 \text{  3) \text{  } 1 = 2 \text{ $   
 $(3 \text{  1)$ g) Yes;  $2 \text{  } 3 = 3 \text{  } 2$ 

h) Yes

69. a)  $\{r, s, t, u\}$ b) 

c) Yes

d) Yes;  $t$ e) Yes;  $r-r, s-u, t-t, u-s$ f)  $(r \text{  } s) \text{  } u = r \text{  } (s \text{  } u)$ g) Yes;  $s \text{  } r = r \text{  } s$ 

h) Yes

71. a)  $\{f, r, o, m\}$     b)     c) Closedd)  $m$     e)  $f$     f)  $g$     g)  $m$     h)  $r$ 

73. Not associative:

$$(M \otimes \text{)} \otimes M \neq M \otimes (\text{)} \otimes M;$$

$$\text{not commutative: } \text{} \otimes M \neq M \otimes \text{}$$

75. No inverse for  $\odot$  or for  $*$ , not associative

77. No identity element, no inverses, not associative, not commutative

79. a)

+	$E$	$O$
$E$	$E$	$O$
$O$	$O$	$E$

b) Yes, it is a commutative group; it satisfies the five properties.

81. Answers will vary.

83. a) Is closed; identity element is 6; inverses: 1-5, 2-2, 3-3, 4-4, 5-1, 6-6; is associative—for example,  
 $(2 \infty 5) \infty 3 = 2 \infty (5 \infty 3)$   
 $3 \infty 3 = 2 \infty 2$   
 $6 = 6$

b)  $3 \infty 1 \neq 1 \infty 3$   
 $2 \neq 4$

85. a)

*	$R$	$S$	$T$	$U$	$V$	$I$
$R$	$V$	$T$	$U$	$S$	$I$	$R$
$S$	$U$	$I$	$V$	$R$	$T$	$S$
$T$	$S$	$R$	$I$	$V$	$U$	$T$
$U$	$T$	$V$	$R$	$I$	$S$	$U$
$V$	$I$	$U$	$S$	$T$	$R$	$V$
$I$	$R$	$S$	$T$	$U$	$V$	$I$

b) Yes, the associative property will hold.

c) No, it is not commutative. For example,  
 $R * S \neq S * R$

87.

+	0	1	2	3	4
0	0	1	2	3	4
1	1	2	3	4	0
2	2	3	4	0	1
3	3	4	0	1	2
4	4	0	1	2	3

89. Add the number in the top row and the number in the left-hand column and divide the sum by 4. The remainder is placed in the table.

b) No; no inverse for 0

## Chapter 11

## Section 11.1, Page 599

1. A percent is a ratio of some number to 100.
  3. Divide the numerator by the denominator, multiply the quotient by 100, and add a percent sign.
- $$5. \text{Percent change} = \frac{\left( \frac{\text{amount in}}{\text{latest period}} \right) - \left( \frac{\text{amount in}}{\text{previous period}} \right)}{\text{amount in the previous period}} \times 100$$
7. 50.0%    9. 40.0%    11. 0.8%    13. 378%    15. 0.04
  17. 0.0134    19. 0.0025    21. 0.002    23. 0.01    25.  $\approx 2.7\%$
  27. 4.7 grams    29. \$47.28 million    31. \$159.57 million
  33. \$5.6848 billion    35. \$9.8838 billion    37. 19.2%
  39. 19.6%    41.  $\approx 5.8\%$
  43. a) 17.3%    b) 43.6%    c) 54.3%    d) 53.9%
  45. a) 4.9%    b) 27.0%    c) 23.5%    d) 10.6%
  47. \$6.75    49. 25%    51. 300

  61.  $\approx 20.9\%$     63.  $\approx 18.6\%$  decrease    65. \$3750
  67. He will have a loss of \$10.    69. \$21.95

## Section 11.2, Page 610

1. Interest is the money the borrower pays for the use of the lender's money.
  3. Security or collateral is anything of value pledged by the borrower that the lender may sell or keep if the borrower does not repay the loan.
  5.  $i$  is the *interest*,  $p$  is the *principal*,  $r$  is the *interest rate* expressed as a percent, and  $t$  is the *time*.
  7. The United States rule states that if a partial payment is made on a loan, interest is computed on the principal from the first day of the loan until the date of the partial payment.
9. \$60.00    11. \$2.81    13. \$15.85    15. \$80.06

  55. a) November 3, 2004    b) \$978.06    c) \$21.94  
d)  $\approx 4.44\%$
  57. a)  $\approx 409.0\%$     b)  $\approx 204.5\%$     c)  $\approx 102.3\%$
  59. a) 6.663%    b)  $\approx 7.139\%$     c) \$6663    d) \$6996.15
  60. a) \$6.42    b) \$14.20    c) \$22.47    d) Answers will vary.

## Section 11.3, page 618

1. An investment is the use of money or capital for income or profit.
  3. A variable investment is one in which neither the principal nor the interest is guaranteed.
  5. a) The effective annual yield is the simple interest rate that gives the same amount of interest as a compound rate over the same period of time.  
b) Another name for effective annual yield is annual percentage yield.
7. a) \$2122.42    b) \$122.42
  9. a) \$3942.72    b) \$442.72
  11. a) \$1728.28    b) \$228.28
  13. a) \$2831.95    b) \$331.95
  15. a) \$4806.08    b) \$806.08
  17. \$8336.15    19. \$1653.36    21. \$2341.82
  23. a) \$4195.14    b) \$4214.36
  25. \$3106.62    27. \$7609.45
  29. a) \$1040.60, \$40.60    b) \$1082.43, \$82.43  
c) \$1169.86, \$169.86    d) No
  31. a) \$1125.51, \$125.51    b) \$1266.77, \$266.77  
c) \$1604.71, \$604.71  
d) Yes; new amount =  $\frac{(\text{old amount})^2}{1000}$
  33.  $\approx 3.53\%$     35. Yes, the APY should be 2.43%.
  37. He will earn more interest in the account that pays the 5% simple interest
  39. a) \$129,210.47    b) \$134.88
  41. \$23,202.23    43. \$12,015.94    45. \$1.53
  47. a) 24 years    b) 12 years    c) 9 years    d) 6 years  
e) 3.27%
  49. \$27,550.11    51. a) \$55,726.01    b) \$55,821.15

## Section 11.4, page 631

1. An open-end installment loan is one with which you can make different payments each month. A fixed installment loan is one in which you pay a fixed amount each month for a set number of months.
  3. The APR is the true rate of interest charged on a loan.
  5. The total installment price is the sum of all the monthly payments and the down payment, if any.
  7. The unpaid balance method and the average daily balance method
9. a) \$5339.96    b) \$698.17
  11. a) \$809.20    b) \$80.15
  13. a) \$628.40    b) 9.0%

15. a) \$1752 b) 9%  
 17. a) 6% b) \$726.00 c) \$7858.00  
 19. a) \$2818.20 b) \$689.39 c) \$347.90 d) \$8614.17  
 21. a) \$1344.87 b) \$181.04 c) \$761.64 d) \$5936.84  
 23. a) \$27.63 b) \$1032.10  
 25. a) \$18 b) \$630.86  
 27. a) \$31 b) \$553.02  
 29. a) \$19.76 b) \$743.41  
 31. a) \$1.56 b) \$133.11  
 33. a) \$512.00 b) \$6.66 c) \$638.43  
 35. a) \$121.78 b) \$1.52 c) \$133.07  
 d) The interest charged using the average daily balance method is \$0.04 less than the interest charged using the unpaid balance method.  
 37. a) \$8.87 b) \$608.87  
 39. a) \$25 b) \$35.60 c) 8.5% d) 6.5%  
 41. a) 6 months b) \$83.95  
 c) The installment loan saves them \$49.45.  
 43. a) \$6872.25 b) \$610.37 c) \$2637.42 d) \$2501.05  
 45. Since Martina's billing date is June 25th, she can buy the camera from June 26th through June 29th and the purchase will appear on her July 25th bill. Since she has a 20-day grace period, she can pay for the camera on August 5th without paying interest.

### Section 11.5, Page 644

1. A mortgage is a long-term loan in which the property is pledged as security for payment of the difference between the down payment and the sale price.  
 3. The major difference is that the interest rate for a conventional loan is fixed for the duration of the loan, whereas the interest rate for a variable-rate loan may change every period, as specified in the loan agreement.  
 5. A buyer's adjusted monthly income is found by subtracting any fixed monthly payments with more than 10 months remaining from the gross monthly income.  
 7. An amortization schedule lists payment dates and payment numbers. For each payment it lists the amount that goes to pay the interest and the principal. It also gives the balance remaining on the loan after each payment.  
 9. Equity is the difference between the appraised value of your home and the loan balance.  
 11. a) \$37,500 b) \$1625.63  
 13. a) \$21,000 b) \$1247.40  
 15. a) \$39,000 b) \$156,000 c) \$3120  
 17. a) \$2865 b) \$802.20 c) \$1411.50 d) No  
 19. a) \$187,736.40 b) \$112,736.40 c) \$38.68  
 21. a) \$31,780 b) \$2451.60 c) \$4330 d) \$1212.40  
 e) \$789.42 f) \$916.09 g) Yes. h) \$108.42

23. Bank B

25. a) 805  
 b)

Payment Number	Interest	Principal	Balance of Loan
1	\$750.00	\$55.00	\$99,945.00
2	\$749.59	\$55.41	\$99,889.59
3	\$749.17	\$55.83	\$99,833.76

c) 9.38%

d)

Payment Number	Interest	Principal	Balance of Loan
4	\$780.37	\$24.63	\$99,809.13
5	\$780.17	\$24.83	\$99,784.30
6	\$779.98	\$25.02	\$99,759.28

e) 9.46%

27. a) \$113,095.24 b) \$150,793.65

**Chapter 12****Section 12.1, Page 659**

1. An experiment is a controlled operation that yields a set of results.  
 3. Empirical probability is the relative frequency of occurrence of an event. It is determined by actual observation of an experiment.

$$P(E) = \frac{\text{number of times event has occurred}}{\text{number of times experiment was performed}}$$

5. Answers will vary.  
 7. No, it means that if a coin was flipped many times, about  $\frac{1}{2}$  of the tosses would land heads up.  
 9. No, it means that the average person with traits similar to Mr. Duncan's will live another 43.21 years.

11.–13. Answers will vary.

15. a)  $\frac{7}{15}$  b)  $\frac{1}{3}$  c)  $\frac{1}{5}$  17. a)  $\frac{8}{19}$  b)  $\frac{7}{19}$  c)  $\frac{1}{19}$

19. a) The percents are relative frequencies of the events occurring.  
 b) 0.32 c) 0.22 d) 0.19

**Section 12.4, Page 683**

1. The expected value is the expected gain or loss of an experiment over the long run.  
 3. The fair price is the amount that should be charged for the game to be fair and result in an expectation of 0.

5. To obtain the fair price, add the cost to the expected value.  
 7. \$0.50. Since you would lose \$1.00 on average for each game you played, the price of the game should be \$1.00 less than the actual cost. Then the expectation would be \$0, and the game would be fair. The results could also be obtained from the fair price formula, fair price = expectation + cost to play.

9. -\$1.20 11. 176 people 13. 70 points

## Section 12.6, Page 703

1. a) At least one event, A or B, must occur.  
b) Both events, A and B, must occur.
3. a) Events that cannot happen simultaneously are mutually exclusive events.  
b)  $P(A \text{ or } B) = P(A) + P(B)$
5. We assume that event A has already occurred.
7. Two events are dependent when the probability of one item being selected has an effect on the probability of a second item being selected.
9. a) No, both events can occur at the same time.  
b) Yes, the outcome of one event has no effect on the outcome of the other event.
11. Events A and B cannot occur at the same time. Therefore,  $P(A \text{ and } B) = 0$ .

## Chapter 13

### Section 13.1, Page 756

1. Answers will vary.
- 3–5. Answers will vary.
7. a) A population is all items or people of interest.  
b) A sample is a subset of the population.
9. a) A random sample is a sample drawn in such a way that each item in the population has an equal chance of being selected.  
b) Number each item in the population. Write each number on a piece of paper and put each numbered piece of paper in a hat. Select pieces of paper from the hat and use the numbered items selected as your sample.
11. a) A stratified sample is one that includes items from each part (or strata) of the population.  
b) First identify the strata in which you are interested. Then select a random sample from each strata.
13. An unbiased sample is one that is a small replica of the entire population with regard to income, education, gender, race, religion, political affiliation, age, and so forth.
15. Stratified sample 17. Cluster sample
19. Systematic sample 21. Convenience sample
23. Random sample 25. a)–c) Answers will vary.
27. President; four out of 42 U.S. presidents have been assassinated (Lincoln, Garfield, McKinley, Kennedy).

### Section 13.2, Page 759

1. Answers will vary.
3. There may have been more car thefts in Baltimore, Maryland than Reno, Nevada because many more people live in Baltimore than in Reno. But, Reno may have more car thefts per capita than Baltimore.
5. Although the cookies are fat free, they still contain calories. Eating many of them may still cause you to gain weight.
7. More people drive on Saturday evening. Thus, one might expect more accidents.
9. People with asthma may move to Arizona because of its climate. Therefore, more people with asthma may live in Arizona.
11. Although milk is less expensive at Star Food Markets than at Price Chopper Food Markets, other items may be more expensive at Star Food Markets.

13. There may be deep sections in the pond, so it may not be safe to go wading.
15. Half the students in a population are expected to be below average.

17. a) Percent of National Expenditures Spent on Hospital Care

b) Percent of National Expenditures Spent on Hospital Care

19. a) Median Age at First Marriage for Males

b) Median Age at First Marriage for Males

21. a) Percent of Survey Respondents That Purchased Clothing Accessories Online, Nov. 2000–Jan. 2001

- b) Yes. Answers will vary.

23. A decimal point

## Section 13.3, Page 765

1. A frequency distribution is a listing of observed values and the corresponding frequency of occurrence of each value.

3. a) 7 b) 16–22 c) 16 d) 22

5. The modal class is the class with the greatest frequency.

7. a) 18 b) 7 c) 19 d) 16–22 e) 51–57

**Section 13.5, Page 784**

- Ranked data are data listed from the lowest value to the highest value or from the highest value to the lowest value.
  - The median is the value in the middle of a set of ranked data. To find the median rank the data and select the value in the middle.
  - The mode is the most common piece of data. The piece of data that occurs most frequently is the mode.
  - The median should be used when there are some values that differ greatly from the rest of the values in the set, for example, salaries.
  - The mean is used when each piece of data is to be considered and “weighed” equally, for example, weights of adult males.
11. 11, 10, 10, 14    13. 69.3, 72, none, 66  
 15. 8, 8, none, 8    17. 13.1, 11, 1, 18.5  
 19. 11.9, 12.5, 13, 11.5    21. 6.5, 5, 3 and 5, 10.5  
 23. a) 4.9, 5, 5, 6    b) 5.3, 5, 5, 6  
 c) Only the mean    d) The mean and the midrange  
 25. A 79 mean average on 10 quizzes gives a total of 790 points. An 80 mean average on 10 quizzes requires a total of 800 points. Thus, Jim missed a B by 10 points, not 1 point.

27. a) 8.8 million    b) 8.0 million    c) None  
 d) 12.2 million  
 29. a) \$5.1 billion    b) \$2.3 billion  
 c) \$2.3 billion and \$1.5 billion    d) \$14 billion  
 e) Answers will vary.  
 31. 510    33. One example is 72, 73, 74, 76, 77, 78.  
 35. a) Yes    b) No    c) No    d) Yes  
 e) Mean = 200; midrange = 275  
 37. a) 33 or greater  
 b) It is not possible if 100 is the maximum possible grade.  
 c) 22 or greater    d) 82 or greater  
 39. One example: 1, 2, 3, 3, 4, 5, changed to 1, 2, 3, 4, 4, 5.  
 41. No, by changing only one piece of the 6 pieces of data you cannot alter both the median and the midrange.  
 43. The data must be ranked.  
 45. He is taller than approximately 35 percent of all kindergarten children.  
 47. a) \$430    b) \$350    c) \$650  
 49. Second quartile, median  
 51. a) \$490    b) \$500    c) 25%  
 d) 25%    e) 17%    f) \$51,000  
 53. a) 

Ruth	Mantle
0.290	0.300
0.359	0.365
0.301	0.304
0.272	0.275
0.315	0.321

  
 b) Mantle's is greater in every case.  
 c) Ruth: 0.316; Mantle: 0.311; Ruth's is greater.  
 d) Answers will vary.  
 e) Ruth: 0.307; Mantle: 0.313; Mantle's is greater.  
 f) Answers will vary.    g) Answers will vary.  
 55. 90    57. a)–c) Answers will vary.

**Section 13.6, Page 793**

- Range = highest value – lowest value
- Answers will vary.    5. Answers will vary.    7.  $\sigma$
- Answers will vary.
- They would be the same since the spread of data about each mean is the same.
- a) The grades will be centered about the same number since the mean, 75.2, is the same for both classes.  
 b) The spread of the data about the mean is greater for the evening class since the standard deviation is greater for the evening class.
11.  $\sqrt{16.5} \approx 4.06$     17.  $\sqrt{4.67} \approx 2.16$   
 19.  $\sqrt{15.2} \approx 3.90$     21.  $\sqrt{3} \approx 1.73$   
 23. \$32,  $\sqrt{137.78} \approx \$11.74$     25. \$150,  $\sqrt{2600} \approx \$50.99$   
 27. a) \$63,  $\sqrt{631.6} \approx \$25.13$     b) Answers will vary.

- c) Answers remain the same, range: \$63, standard deviation  $\approx$  \$25.13.

29. a)–c) Answers will vary.

- d) If each number in a distribution is multiplied by  $n$ , the mean and standard deviation of the new distribution will be  $n$  times that of the original distribution.

- e) The mean of the second set is  $4 \times 5 = 20$ , and the standard deviation of the second set is  $2 \times 5 = 10$ .

31. a) The standard deviation increases. There is a greater spread from the mean as they get older.

- b)  $\approx 133$  lb c)  $\approx 21$  lb

- d) Mean:  $\approx 100$  lb; normal range:  $\approx 60$  to 140 lb

- e) Mean:  $\approx 62$  in.; normal range:  $\approx 53$  to 68 in. f) 5%

East		West	
Number of Oil Changes Made	Number of Days	Number of Oil Changes Made	Number of Days
15–20	2	15–20	0

57–62	2	57–62	0
63–68	1	63–68	0

b) Number of Oil Changes Made Daily

- c) They appear to have about the same mean since they are both centered around 38.

- d) The distribution for East is more spread out. Therefore, East has a greater standard deviation.

- e) East: 38, West: 38 f) East:  $\approx 12.64$ , West:  $\approx 5.98$

35. 6, 6, 6, 6, 6

### Section 13.7, Page 804

1. A rectangular distribution is one in which all the values have the same frequency.

3. A bimodal distribution is one in which two nonadjacent values occur more frequently than any other values in a set of data.

5. A distribution skewed to the left is one that has “a tail” on its left.

7. a) B b) C c) A 9.–11. Answers will vary.

13. Normal 15. Skewed right

17. The mean is the greatest value. The median is lower than the mean. The mode is the lowest value.

19. Answers will vary. 21. They all have the same value.

23. A z-score will be negative when the piece of data is less than the mean.

25. 0 27. 0.500 29. 0.818 31. 0.034 33. 0.037

35. 0.019 37. 0.053 39. 26.1% 41. 89.8%

43. 97.1% 45. 97.5% 47. 2.9%

d) 0.999 e) 0.990 f) Answers will vary.

g)  $y = 5.4x - 183.4$  h)  $y = 16.2x - 669.8$

i) Dry, 232.4 ft; wet, 577.6 ft

51. Answers will vary.

53. a) 0.991 b) Should be the same.

c) 0.991, the values are the same.

### Review Exercises, Page 821

- a) A population consists of all items or people of interest.  
b) A sample is a subset of the population.
- A random sample is one where every item in the population has the same chance of being selected.
- The candy bars may have lots of calories, or fat, or sodium. Therefore, it may not be healthy to eat them.
- Sales may not necessarily be a good indicator of profit. Expenses must also be considered.

1. A vertex is a designated point.
3. To determine whether a vertex is odd or even, count the number of edges attached to the vertex. If the number of edges is odd, the vertex is odd. If the number of edges is even, the vertex is even.
5. 5 vertices, 7 edges 7. 7 vertices, 11 edges
9. Each graph has the same number of edges from the corresponding vertices.
11. odd vertices:  $C, D$ ; even vertices:  $A, B$
13. Yes; start at  $C$  and end at  $D$ , or start at  $D$  and end at  $C$ .
15. Yes; start at any point and end where you started.
17. No.
19. Yes; start at  $A$  and end at  $C$ , or start at  $C$  and end at  $A$ .
21. a) 0 odd, 5 even b) Yes  
c) Start in any room and end where you began. One path is  $A$  to  $D$  to  $B$  to  $C$  to  $E$  to  $A$ .  
b) not traversable.
23. a) 2 odd, 4 even b) Yes  
c) Start at  $B$  and end at  $F$ , or start at  $F$  and end at  $B$ . One path is  $B$  to  $C$  to  $F$  to  $E$  to  $D$  to  $A$  to  $B$  to  $E$  to  $F$ .
25. a) 4 odd, 1 even b) Not possible
27. a) 3 odd, 2 even b) Not possible
29. The door must be placed in room D. Room D is the only room with an odd number of doors.
31. Yes; there are two odd vertices. Begin at either the island on the left or on the right and end at the other island.
- 33.
35. a) Kentucky, Virginia, North Carolina, Georgia, Alabama, Mississippi, Arkansas, Missouri  
b) Illinois, Arkansas, Tennessee
37. a) 4 b) 4 c) 11
- 39.
41. a) Yes, the graph has exactly 2 odd vertices.  
b) One possibility is  $C, A, B, E, F, D, G, C$ .

# INDEX

Note: Page numbers preceded by AA indicate material in the Appendix.

- Abacus, 176
- Abel, Niels, 564
- Abelian groups, 561–562, 564–565
- Absolute value, 812
- Abstract algebra, 581
- Acoustics, 791
- Actuarial method, 624–626
- Acute angle, 479
- Acute triangle, 487
- Adams, John Quincy, 460
- Addition
  - associative property of, 251–252, 253
  - commutative property of, 251, 253
  - in different base systems, 189–192
  - distributive property of
    - multiplication over, 252, 253, 293–294
  - of fractions, 235–238
  - of integers, 220–221
  - of irrational numbers, 244–245
  - of matrices, 402–403
  - in modular arithmetic, 580–581
- Addition formula, 696–697
- Addition method, for linear equation systems, 393–398
- Addition property of equality, 294
- Additive identity element, 563
- Additive inverse, 221–222, 563
- Additive systems, 167–171
- Add-on rate, 640
- Adjacent angles, 479
- Adjustable-rate mortgage, 635–636, 640–642
- Adjusted monthly income, 636–637
- Advertising, deceptive, 148, 757–759
- Age, bone length and, 381
- Aggregate rate cap, 641
- Aleph-null, 85
- Algebra, 287–302
  - abstract, 581
  - Boolean, 156
  - checking solutions in, 288
  - constants in, 288
  - definition of, 288
  - linear equations in, 292–317
  - linear inequalities in, 329–332
  - multiplication in, 288
  - order of operations in, 289–291
  - overview of, 288
  - quadratic equations in, 350–359
  - solving equations in, 288
  - variables in, 288
  - variation in, 320–326
  - word problems in, 314–317
- Algebraic equation, terms of, 292–293
- Algebraic expression, 288
  - evaluation of, 289
  - examples of, 313–314
  - factoring of, 352
  - simplification of, 293
- Algebraic notation, 288
- Algorists, 175
- Algorithm(s), 121, 351
  - computer applications of, 114, 164–165, 351
  - definition of, 121, 296
  - Euclidian, 218
  - for satisfiability problems, 121
  - simplex, 421
  - for weather forecasting, 365
- all*, as quantifier, 94–95
- Allowable tolerance, 330
- Alternate exterior angles, 481
- Alternate interior angles, 481
- American Standard Code for Informational Interchange (ASCII) code, 182
- Ammann, Simon, 341
- Amortization schedule, 640
- Ampere, 465
- Ancient Greeks, 228
- and* probability problems, 698–702
- and* statements, 61, 96–97, 101–103, 133, 160
  - dominance of, 101–103
  - equivalent, 133
  - intersection of sets and, 61
  - truth table for, 107–109
- Angle(s), 478–482
  - acute, 479
  - adjacent, 479
  - complementary, 479
  - corresponding, 481, 486, 487
  - definition of, 478
  - degrees of, 478–479
  - exterior, 481
  - interior, 481
    - sum of measures of, 486
  - measure of, 478
  - naming of, 478
  - obtuse, 479
  - right, 479
  - of rotation, 525
  - sides of, 478
  - straight, 479, 486
  - supplementary, 479
  - trisecting of, 479
  - vertex of, 478
  - vertical, 481, 486
- Animation, computer, 485
- Annual interest rate, 604–605
- Annual percentage rate, 615–617, 622, 623
- Annuity, 621
- Antecedent, 99, 118
- Antennas, fractal, 550
- Appel, Kenneth, 540–541
- Approximation. *See also* Estimation
  - of large number, 257
  - of square root, 246–247
  - symbol for, 247
- Arc, in graphing, AA-2
- Archimedes, 22
- Architecture, golden proportion in, 277, 278
- Area, 496–498
  - of circle, 500–503
  - metric units for, 441–443
  - of parallelogram, 497
  - vs. perimeter, 498
  - of rectangle, 496, 498
  - of square, 496, 498
  - of trapezoid, 498
  - of triangle, 497
  - unit conversion for, 461, 462
- Area sample, 754
- Arguments. *See also* Logic
  - invalid, 143, 148–149, 154, 160
  - sylogistic, 153–157
  - symbolic, 142–150
  - valid, 143–147, 154–157, 160
- Aristotelian logic, 93
- Aristotle, 4, 92, 93, 135, 153
- Arithmetic
  - fundamental theory of, 211
  - modular, 579–585
  - universal, 294
- Arithmetic mean, 753, 778
- Arithmetic sequences, 268–270
- Art
  - Fibonacci numbers in, 279
  - golden rectangle in, 278
- ASCII code, 182
- Assignment of truth value, 94
- Associative groups, 561–562, 564, 569–570

- Associative property, 251–252, 293–294
  - of addition, 251–252, 253
  - of mathematical systems, 561–562, 564, 569
  - of multiplication, 251–252, 253
- Augmented matrix, 412–415
- Average, 757
  - definition of, 778
  - mean as, 753, 778
  - median as, 779–780
  - mid-range as, 780
  - mode as, 780
  - weighted, 788

Office Visit, 743  
Pediatric Dosage, 36, 467, 472  
Physical Therapy, 586  
Potassium, 599  
Prader-Willi Syndrome, 660  
Proper Dosage, 303, 445  
Reduced Fat Milk, 600  
Sales of Botox, 371  
SARS Cases, 595  
Smoking and Cancer, 5, 467, 472  
Stomach Ache Remedy, 467  
Target Heart Rate, 375  
Vision Surgery, 743  
Weight, 37, 655, 806  
X-Rays, 32

### Home And Garden

A Branching Plant, 286  
A Dinner Party, 728  
A Dinner Toast, 729  
Amount of Recipe Ingredients, 25, 32, 237, 240, 241, 283, 286, 303, 377  
Area of a Garden, 449, 506  
Buying Carpet, 466, 470, 505  
Buying Plants, 39  
Chlorine in a Swimming Pool, 819  
Cornflakes, 466  
Cost of Flooring, 505, 554  
Crop Storage, 240  
Dimensions/Area of a Deck, 318  
Dimensions of a Bookcase, 319  
Dimensions of a Fenced Area, 316  
Dimensions of a Room, 241  
Drying Time, 292  
Enclosing Two Pens, 318  
Estimating Bushels of Grapes, 9  
Estimating Number of Grubs in a Lawn, 14  
Farmland Area, 449  
Fertilizer Coverage, 29, 378, 501

Fish Tank Capacity, 449, 452, 457, 470, 471, 512, 517  
Floor Area, 318  
Floor Molding, 241  
Flower Box Volume, 518  
Flower Garden, 350, 360  
Flower Probabilities, 701  
Food Mixtures, 400, 457  
Gasoline Containers, 516  
Grass Growth, 292  
Grass Seed Coverage, 303  
Hanging a Picture, 241  
Hanging Wallpaper, 346  
Height of a Computer Stand, 240  
Height of a Tree, 29, 489  
Installing Tile, 502, 505, 554  
Irrigation System, 22  
Landscape Service, 385, 389, 505  
Leaking Faucet, 31, 518  
Making Cookies, 467  
Orange Orchards, 292  
Painting a House, 334

Promotions, 676  
Real Estate, 80  
Salaries, 274, 318, 374, 428, 602, 648, 775, 777, 785, 788, 824  
Salary Options, 334, 686  
Sales Commission, 318  
Sales Staff Turnover, 783  
Salesperson Promotion, 807  
Transportation to Work, 743  
Where Teens Work, 774  
Work Schedules, 217, 584, 587, 590  
Work Shift, 735  
Years Until Retirement, 793

### Numbers

A Square Pattern, 6  
A Triangular Pattern, 6  
Aerial Tram Load, 438  
Codes/IDs/Passwords, 722, 723, 749  
Combinations, 725, 726, 727, 728, 731, 732  
Counting Principle, 689, 714  
Digits, 745  
Discovering an Error, 82  
License Plates, 722, 723  
Magic Squares, 28, 33, 37, 39  
Number Puzzle, 33  
Palindromes, 33, 37  
Pascal's Triangle, 729  
Permutations, 716, 717, 719, 720, 723  
Possible Phone Numbers, 723  
Social Security Numbers, 722, 778, 819  
Sum of Numbers, 37  
Using the Addition Formula, 696

### Probability

A Marked Deck, 736  
Apples from a Bucket, 749  
Bean Bag Toss, 670  
Choosing One Bird from a List, 664, 670  
Choosing Two Aces, 748  
Coin Toss, 655, 660, 693, 746  
Color Chips, 748  
Dealing Cards, 734  
Design an Experiment, 662  
Drawing from a Hat, 711, 734  
Expectation and Fair Price, 683  
Expected Value, 684  
Finding Probabilities, 663, 674  
Green and Red Balls, 734  
Marbles, 670, 676, 693  
Picking Chips, 685, 686, 695, 706  
Raffles, 668, 681, 685, 745  
Rock Toss, 662  
Rolling Dice, 660, 671, 676, 684, 686, 693, 711  
Roulette, 677  
Selecting Balls, 688  
Selecting Cards from a Deck, 666, 668, 684, 699, 700, 743, 749  
Selecting Colored Balls With Replacement, 739

Selecting Items at Random, 692  
Slot Machine, 705  
Spin the Spinner, 668, 675, 685, 704  
Spinning a Wheel, 706, 711, 746  
Using Conditional Probability Formula, 709  
Wheel of Fortune, 668, 687

## **Sports and Recreation**

A Home Run, 439  
Art Show, 317  
Athletes' Salaries, 795  
Attending Plays, 728  
Barbie and Ken Dolls, 217  
Baseball, 274, 595, 685, 733, 734  
Basketball, 63, 400, 684  
Batting, 724, 787  
Bicycles, 734, 745  
Big Screen TVs, 728  
Billiard Balls, 675  
Bowl Games, 675  
Broadway Shows, 777  
Card Games, 706, 707, 731, 735, 745  
Chess Tournaments, 598  
Chorus and Band, 65  
Climbing a Mountain Range, 588  
Club Membership, 648, 722, 725, 735, 746  
Daily Double/Trifecta, 721, 722  
Darts, 669  
Dogsled, 747  
Dominos, 33  
Entertainers, 728  
Estimating Weights, 14  
Expected Movie Attendance, 684  
Fishing, 601, 748, 793  
Fitness Equipment, 76  
Fitness Test Scores, 805  
Football Yardage, 227  
Game of Pit Score, 226  
Golf, 400, 704  
Hiking, 818  
Hitting a Bulls-Eye, 661  
Horse Racing, 677, 745  
Jazz Concert, 775  
Jet Ski Rental, 36  
Logic Game, 165  
Lottery, 5, 30, 675, 677, 684, 687, 706, 729, 734, 747  
Magazines, 748  
Most Improved Baseball Record, 595  
Movie Ratings, 819  
Music, 723, 728  
Olympic Medals, 72  
Oscars, 36  
Painting, 724, 728  
Park Visits by Families, 766  
Photography, 328  
Plasma Television, 506  
Playing Bingo, 676  
Professional Teams, 81  
Remote Control, 693  
Rock Concert, 676

Running, 438  
Sand Volleyball Court, 509
